La Rochelle  
Université

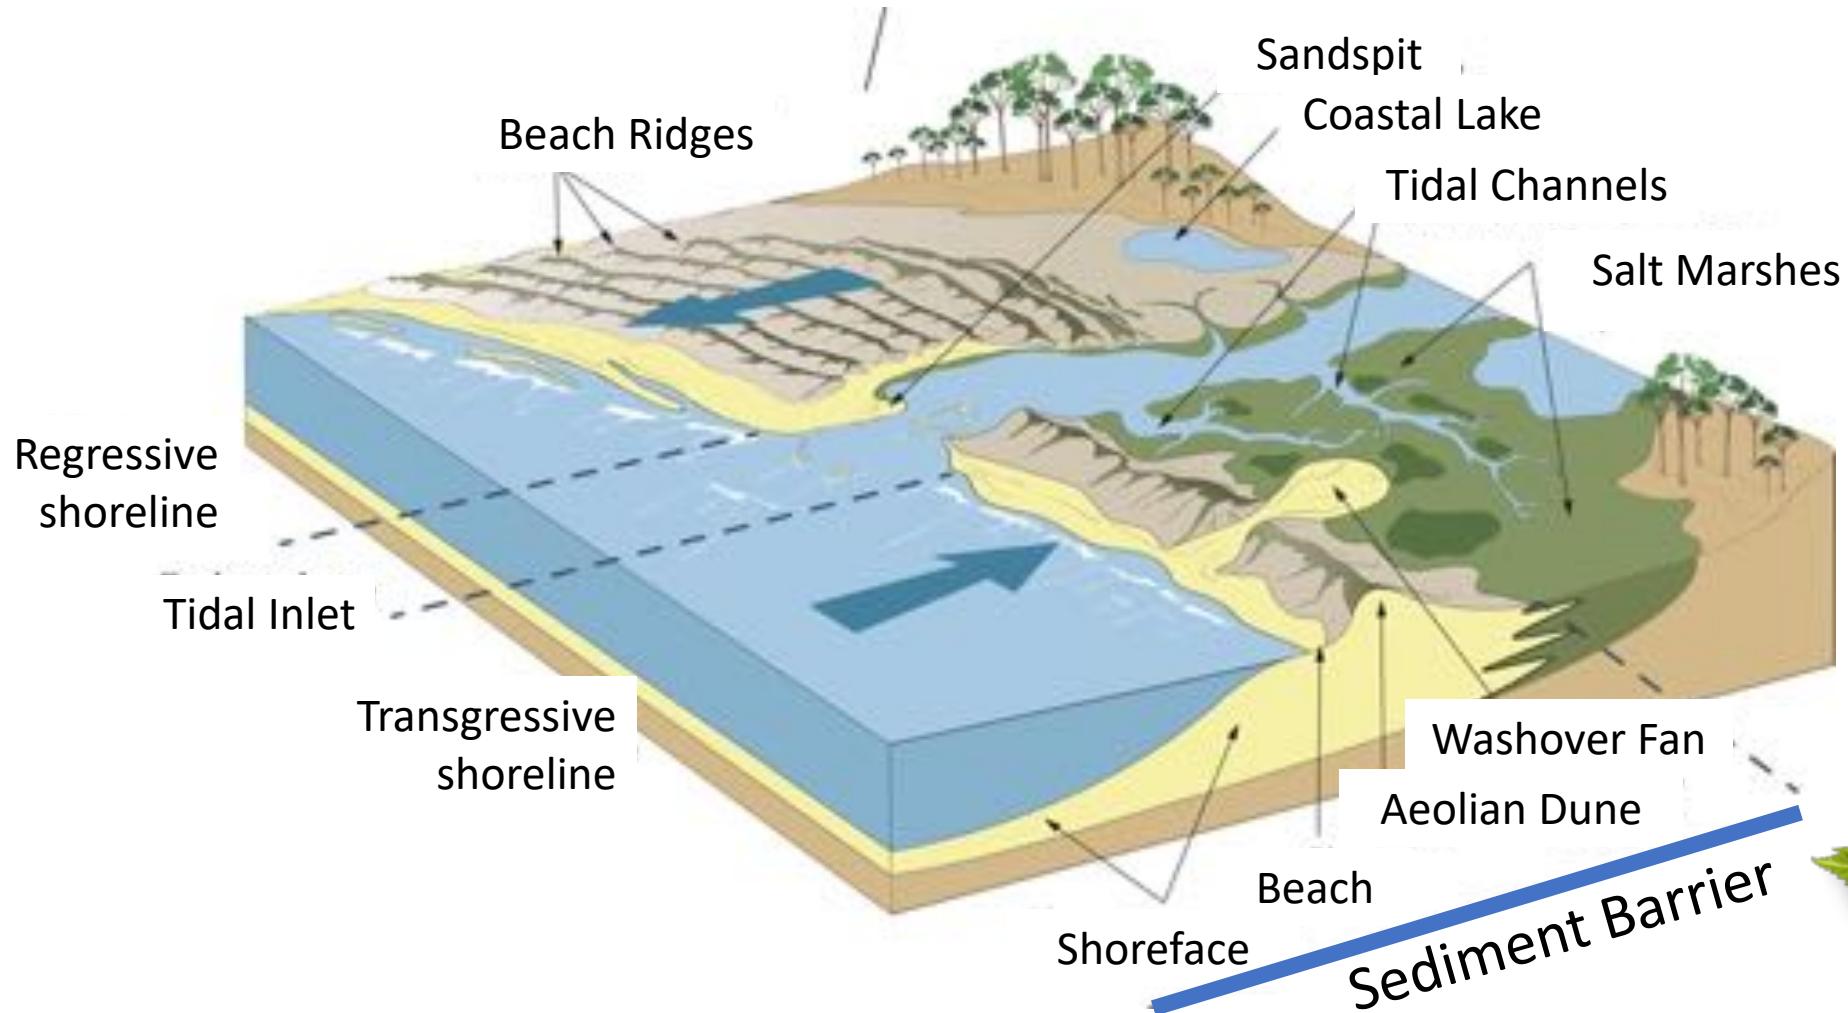

Italian-French Bilateral Cooperation in Heritage Science: “Human-centered approach for cultural heritage in green transition: disciplines talking to each other”

Online event

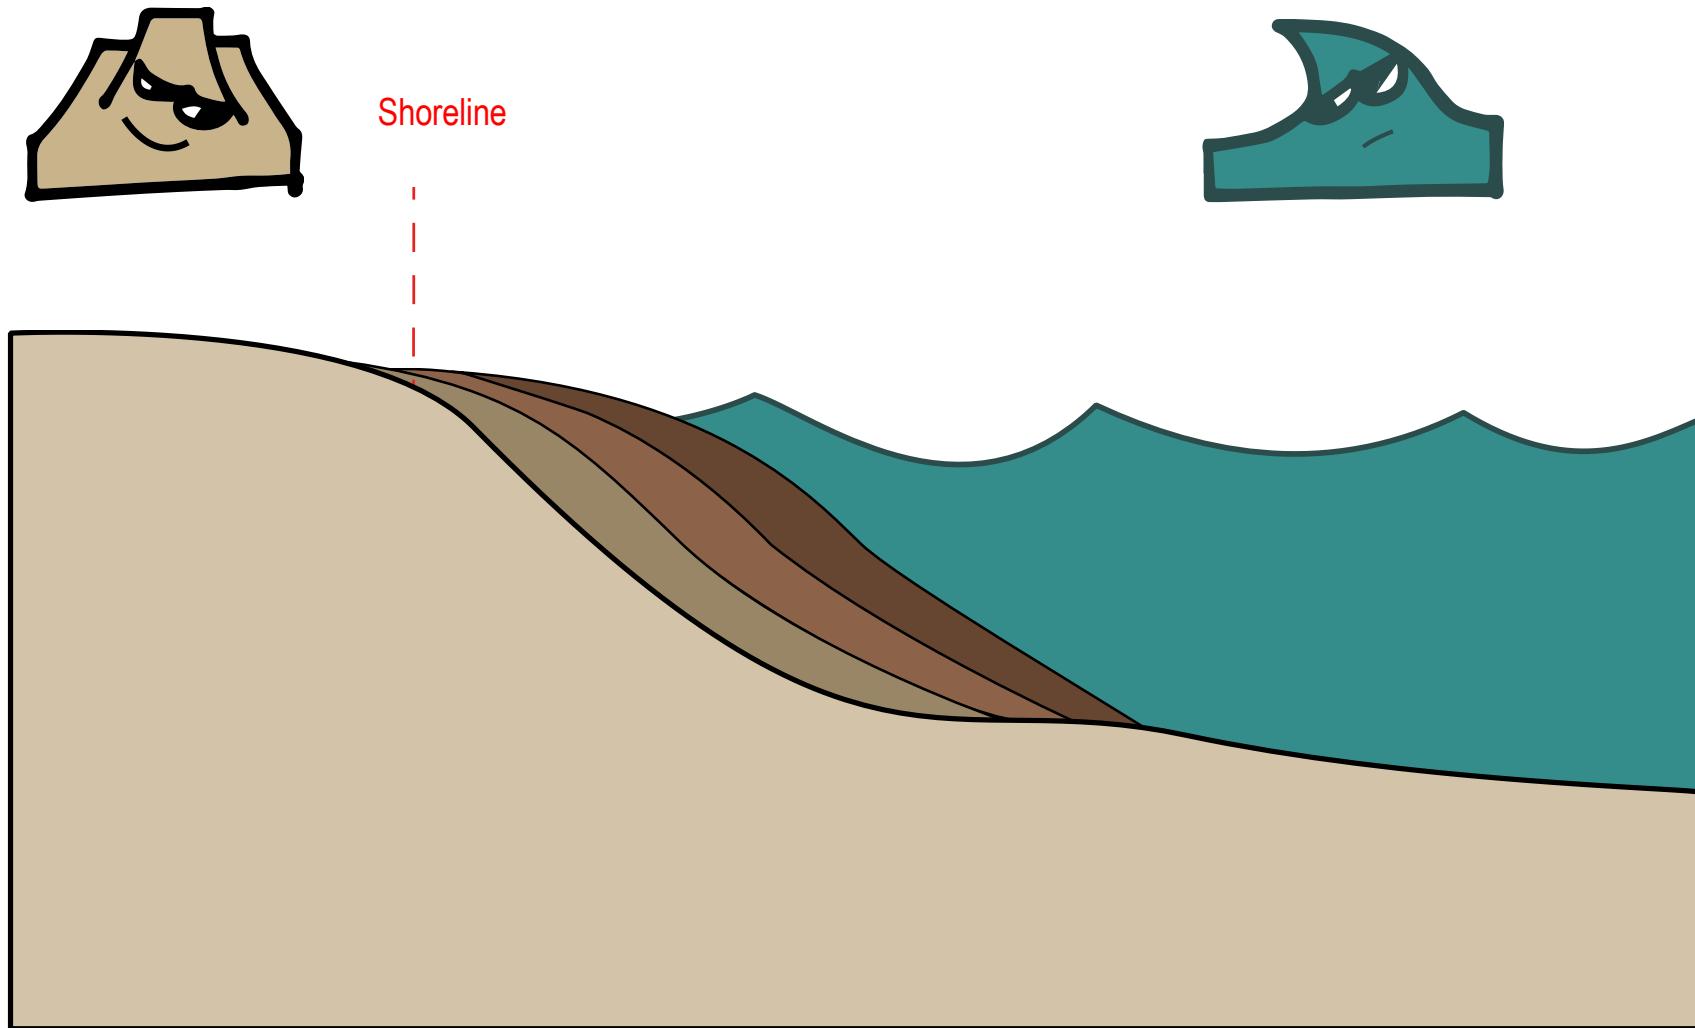

Thursday, 10th November 2022

# Evolutions of Sedimentary coasts without Climate Change

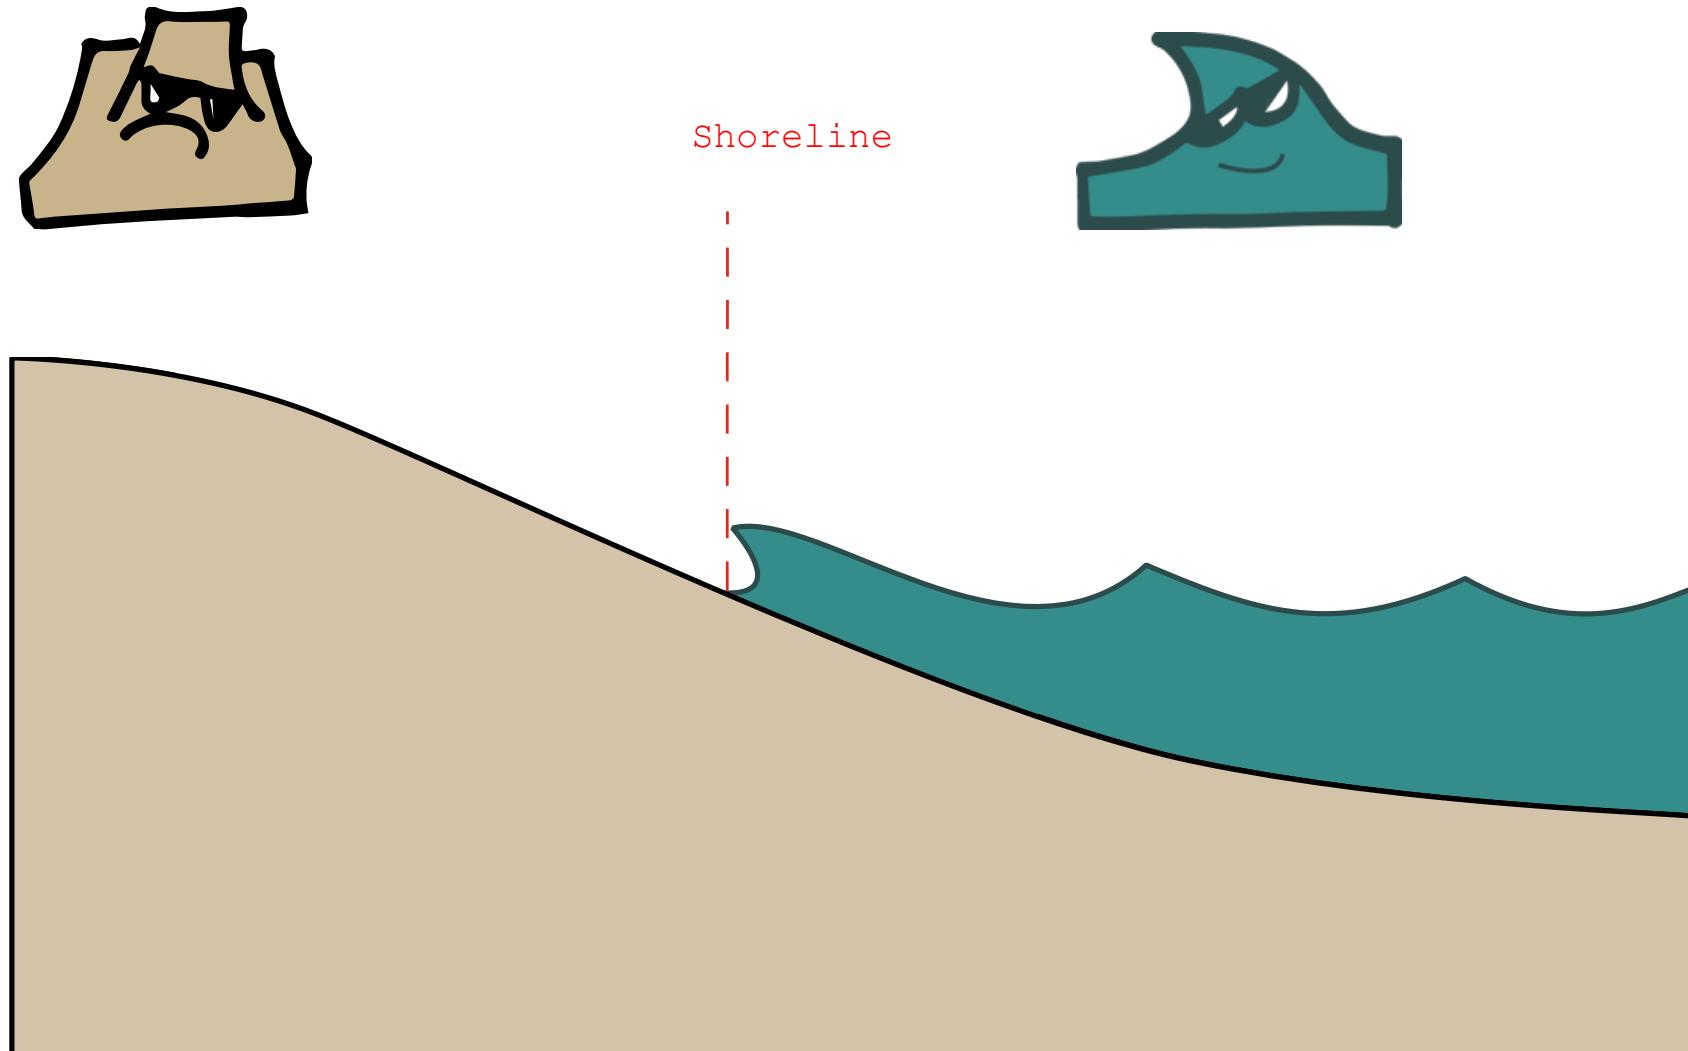

## Transgressive vs regressive coasts

# Regressive Coasts

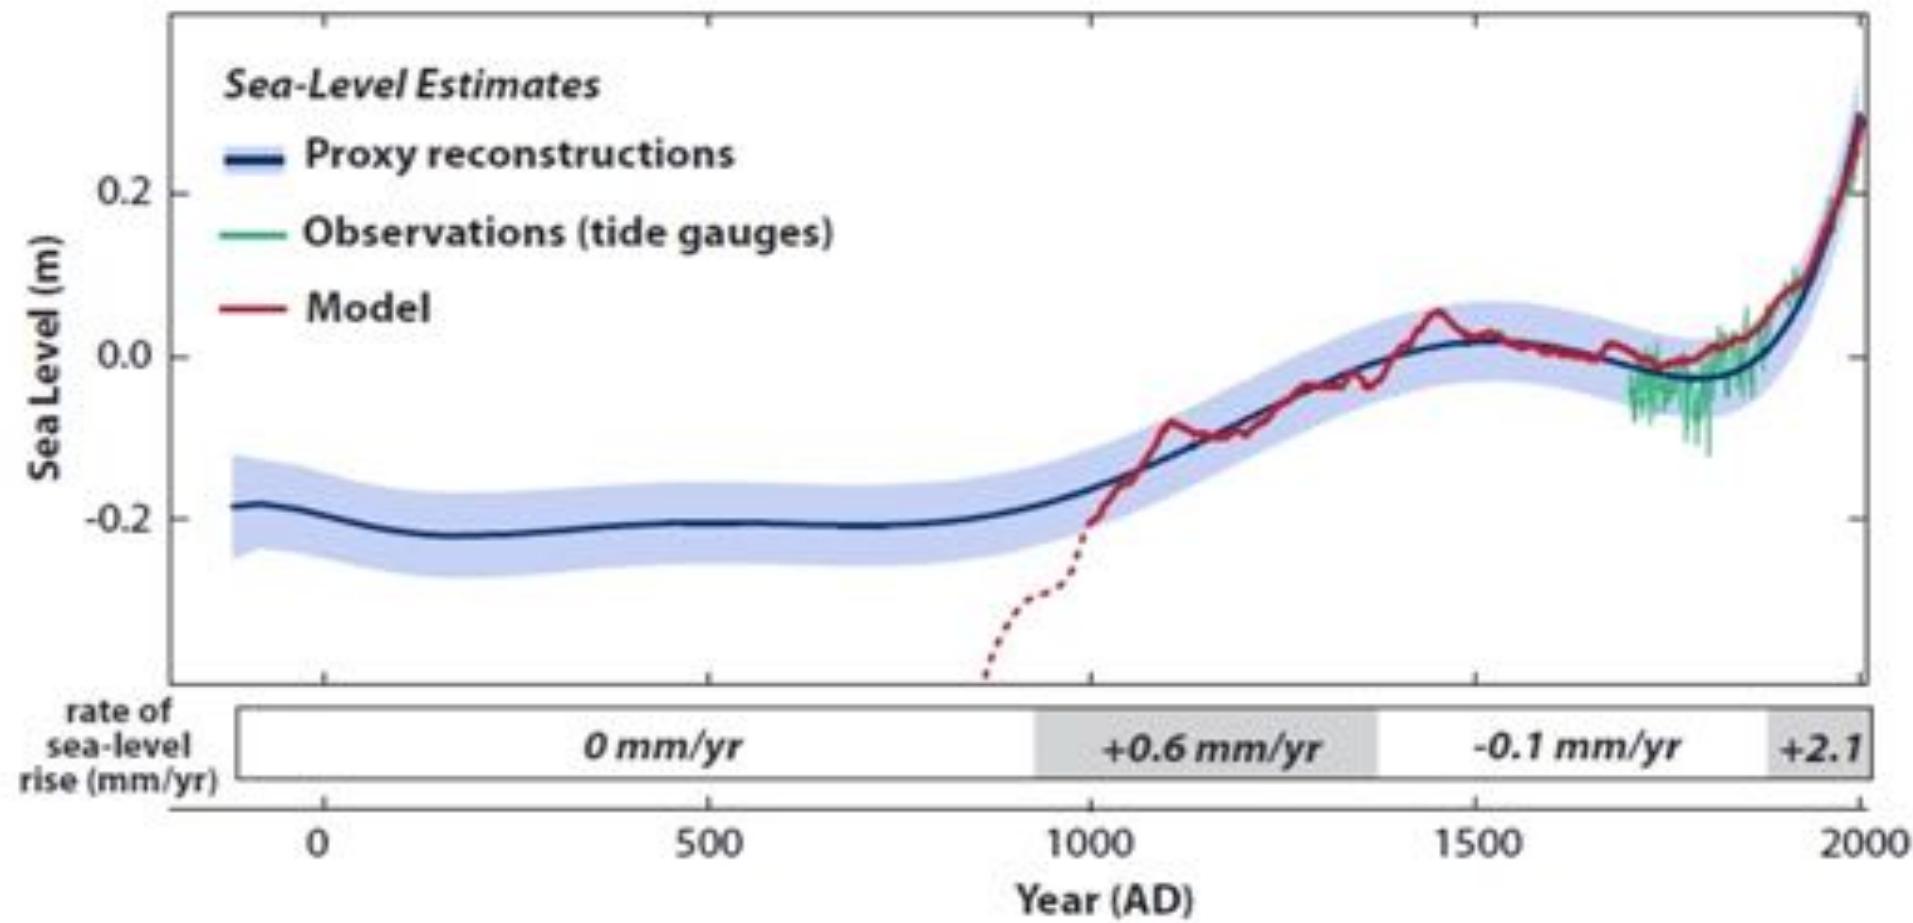

# Transgressive Coasts

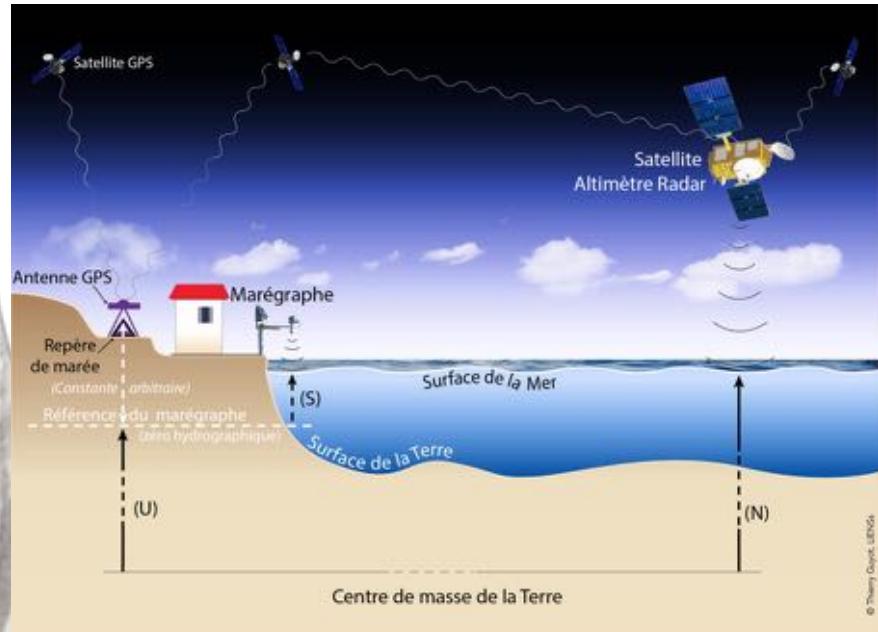

# Global Sea Level Rise

Since 1900 CE, sea level rise is 3 to 5 times faster than during the last 1000 years

# Global Sea Level Rise Observations vs Forcing parameters

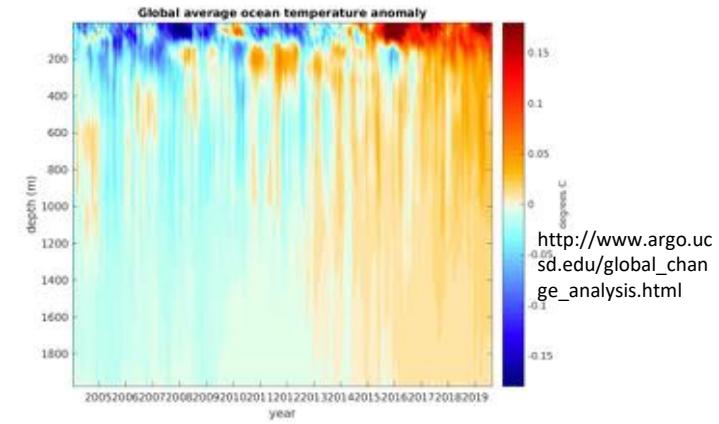

3,6 mm / an

1,8 mm / an

1,4 mm / an

0,4 mm / an

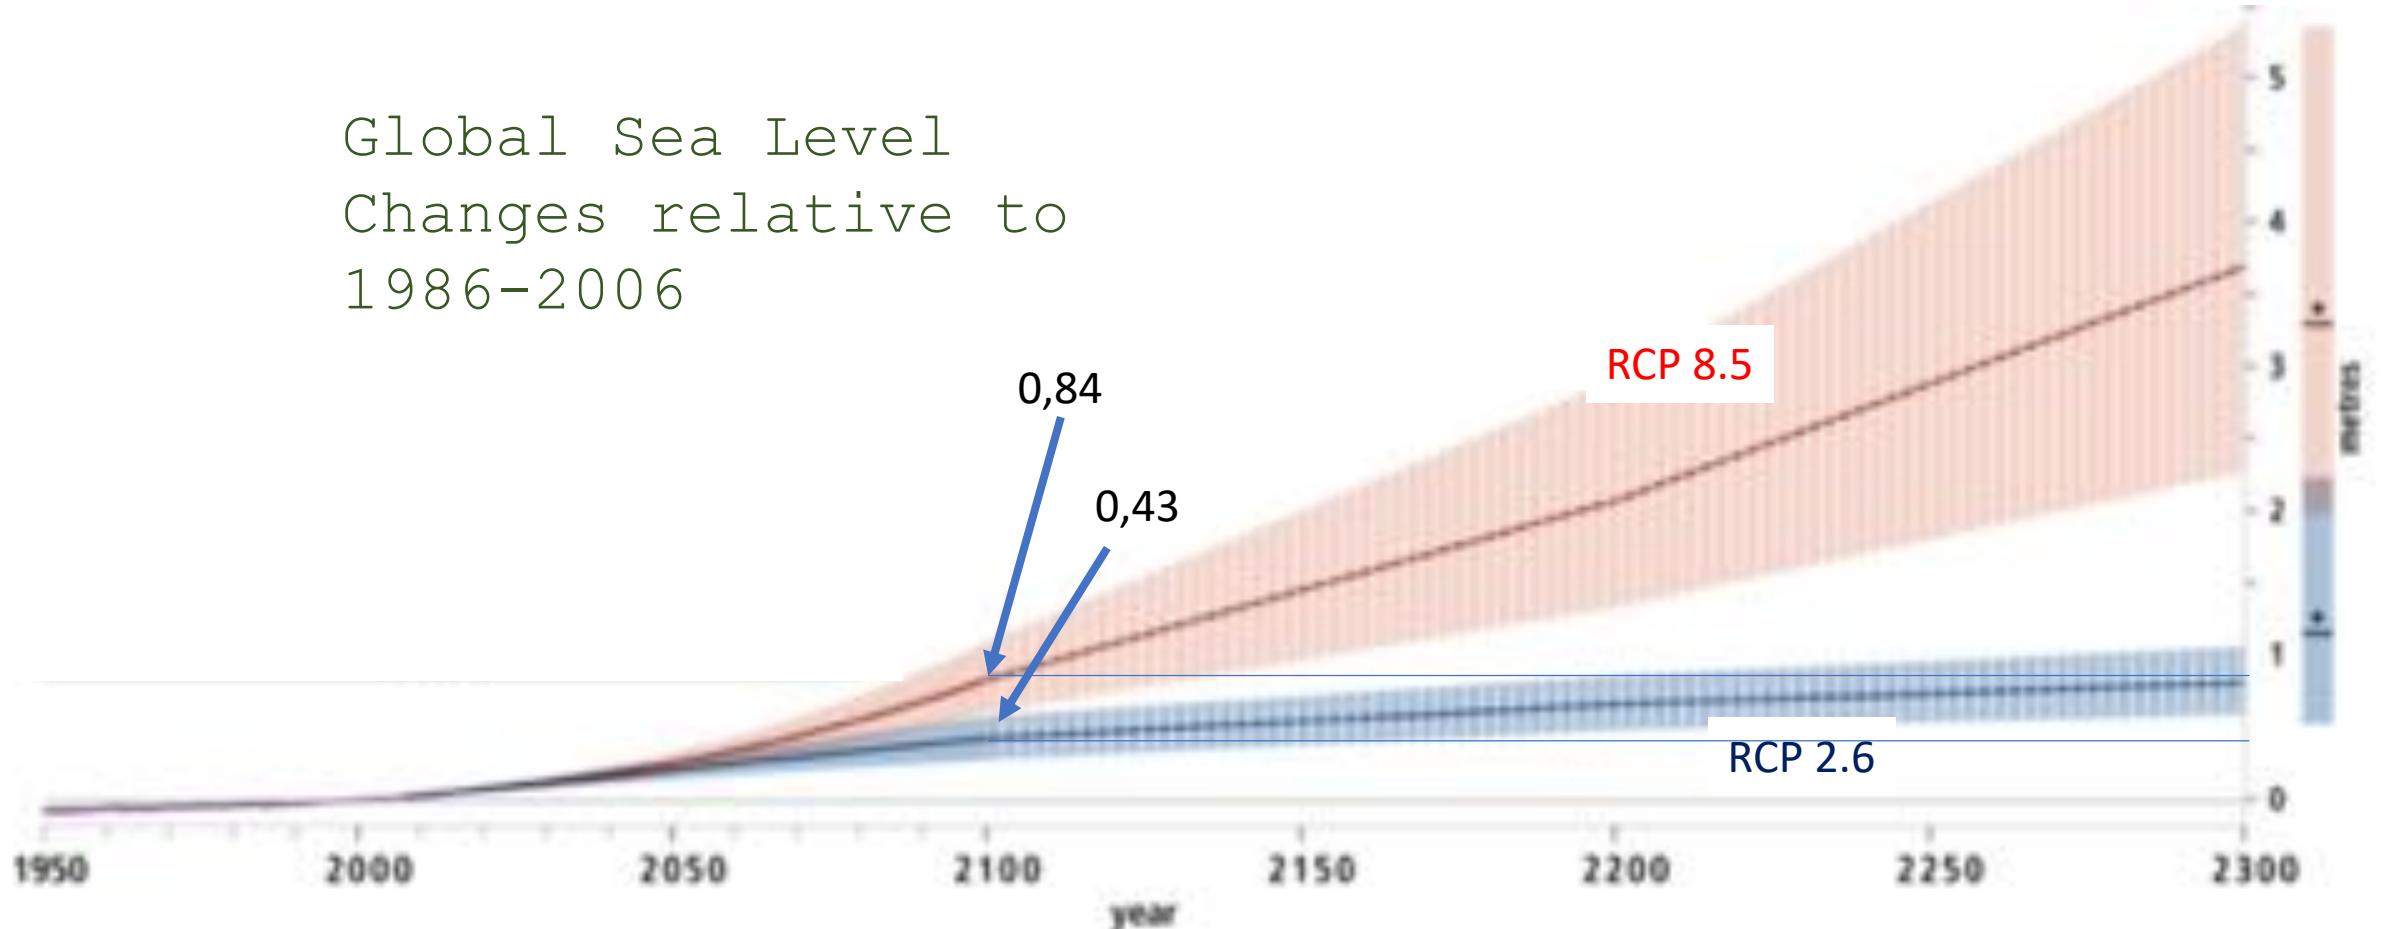

= 3,6 mm / an

# Global Sea Level Rise projections

Global Sea Level  
Changes relative to  
1986-2006

IPCC 2019 09

# Global Sea Level Rise local projections

<https://sealevel.nasa.gov/ipcc-ar6-sea-level-projection-tool>

Se Level Projection Tool

Nasa Sea Level Change

IPCC

2.6

sea level rise: 0.38 m , long: -1.3347°, lat: 45.7060°

# Global Sea Level Rise local projections

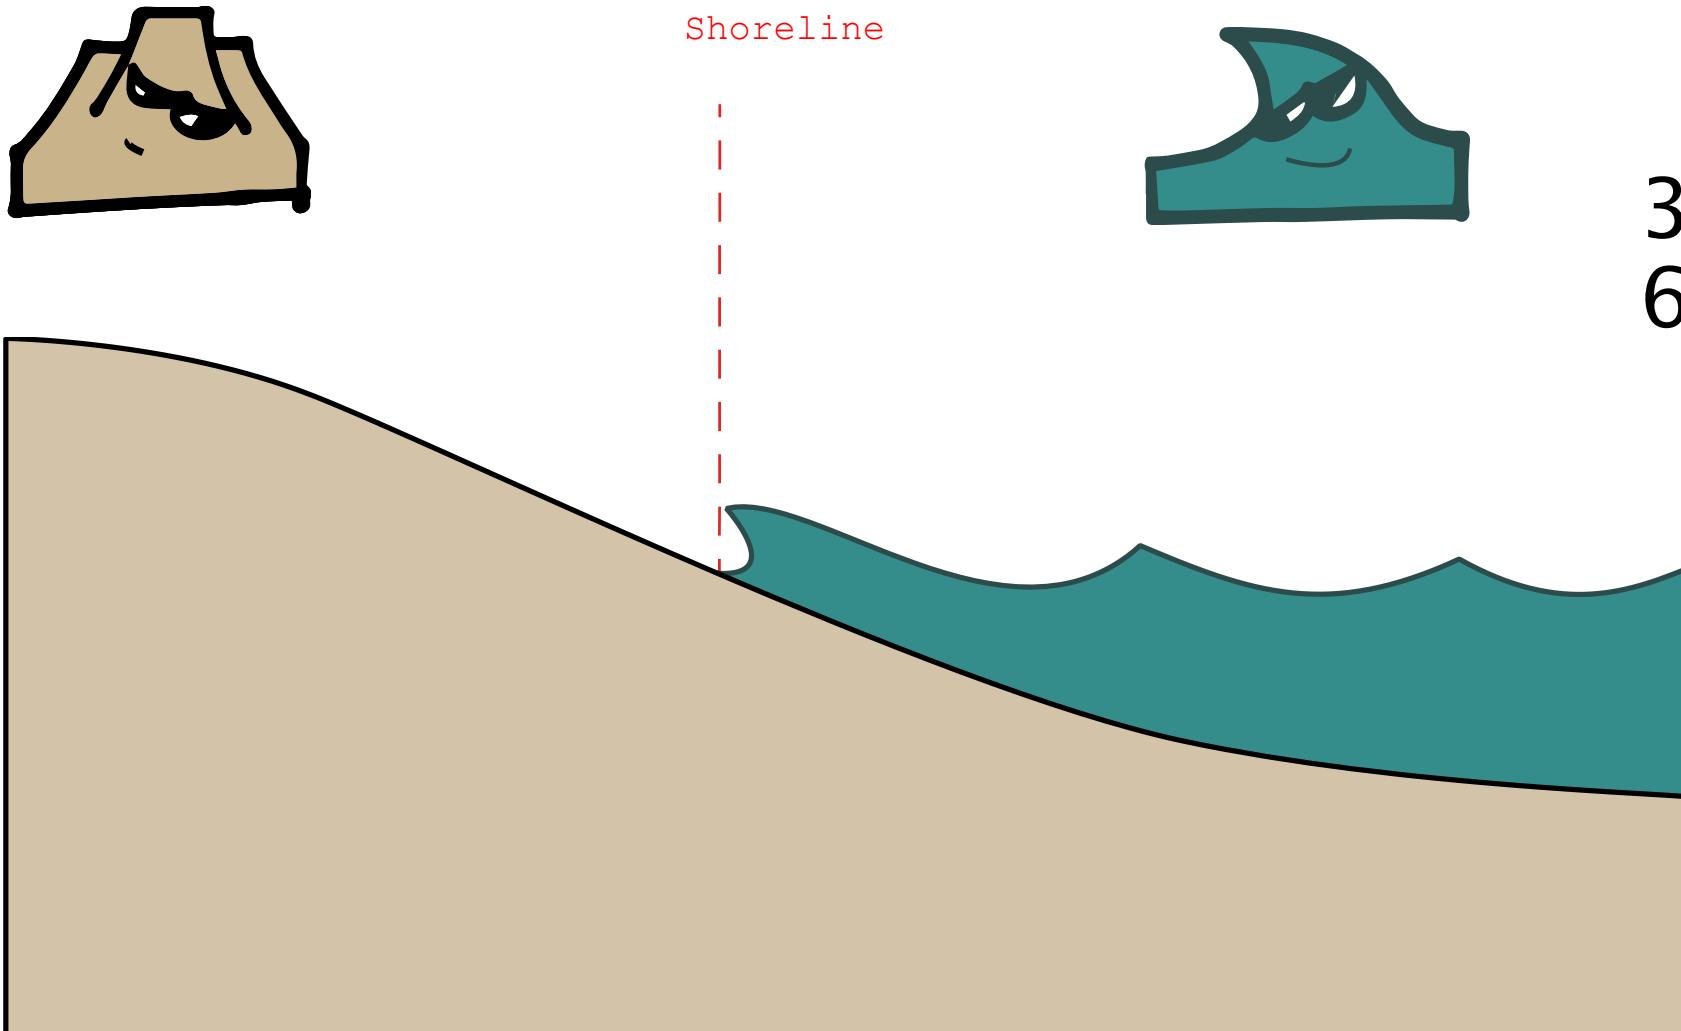

<https://sealevel.nasa.gov/ipcc-ar6-sea-level-projection-tool>

Se Level Projection Tool  
Nasa Sea Level Change  
IPCC

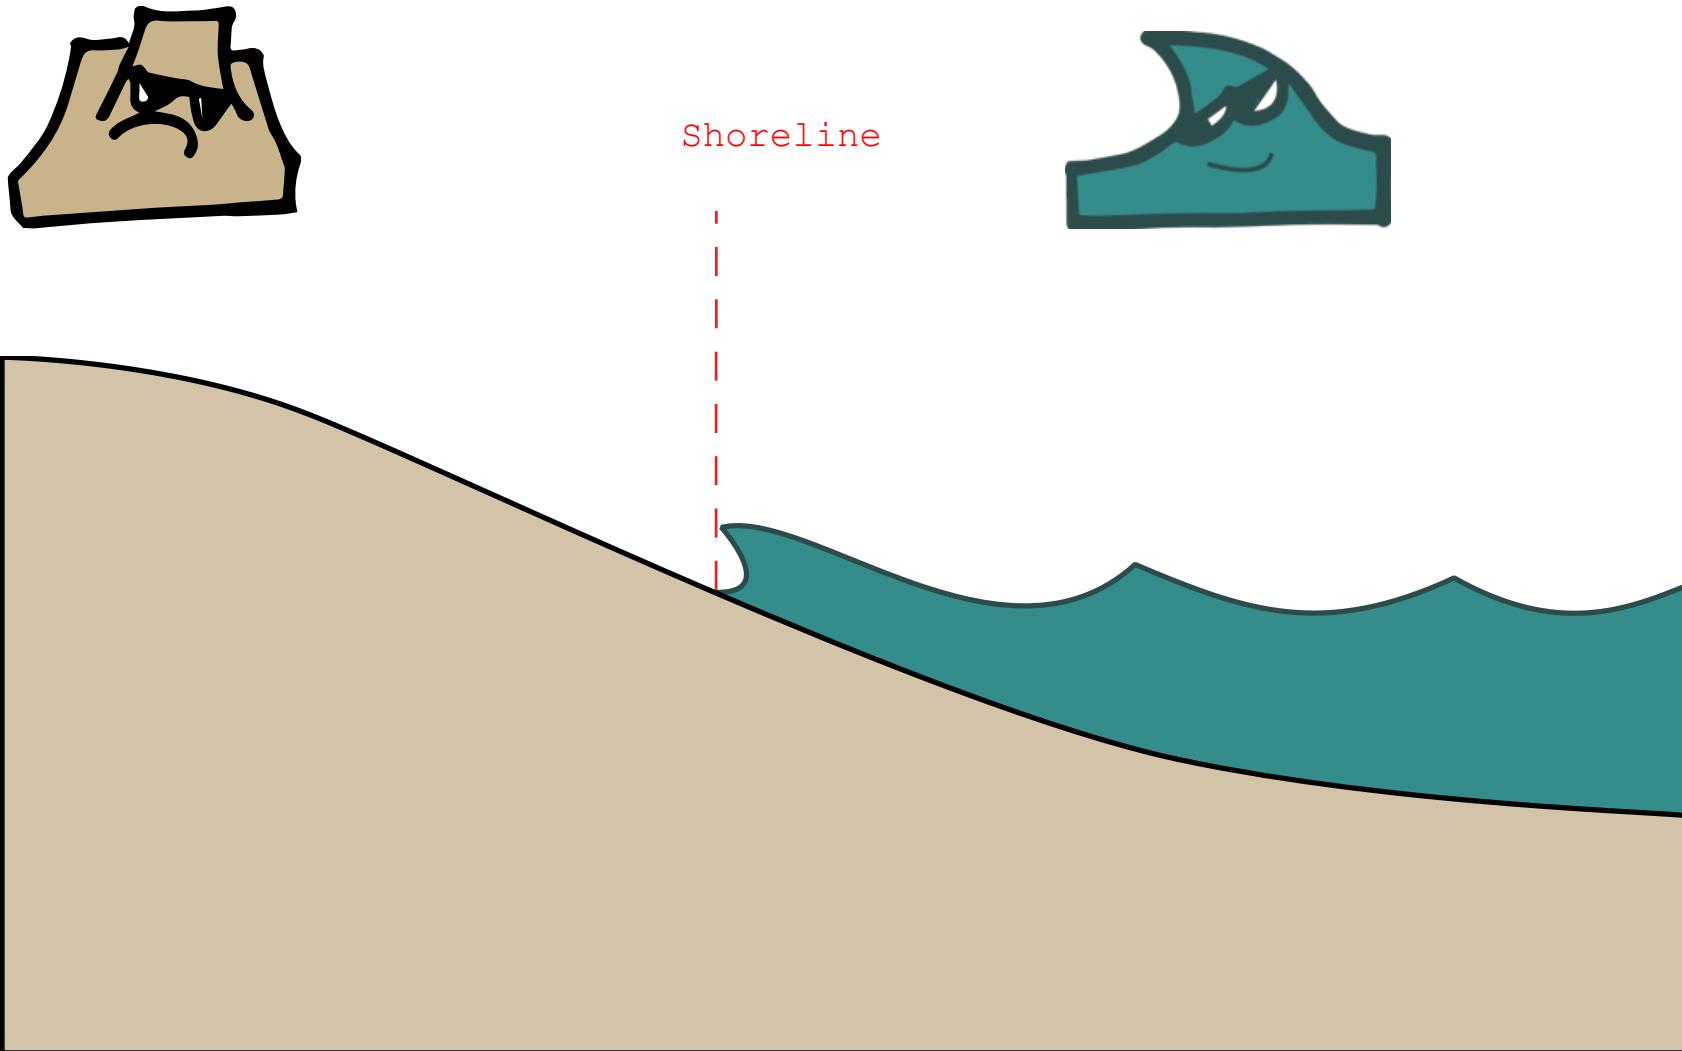

8.5 sea level rise: 0.64 m , long: -1.3516°, lat: 45.8378°

# Sea Level Rise & Coastline retreat approximatively 100 x SLR

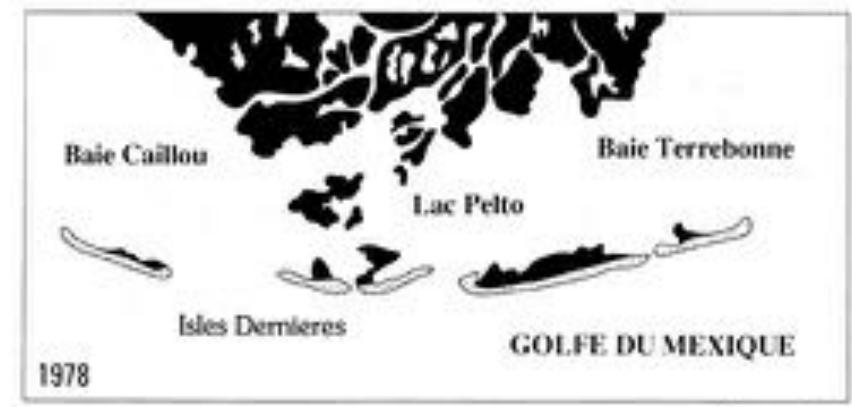

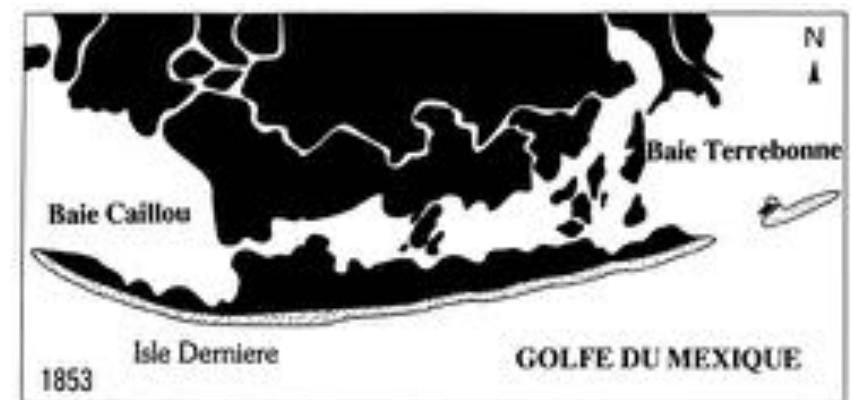

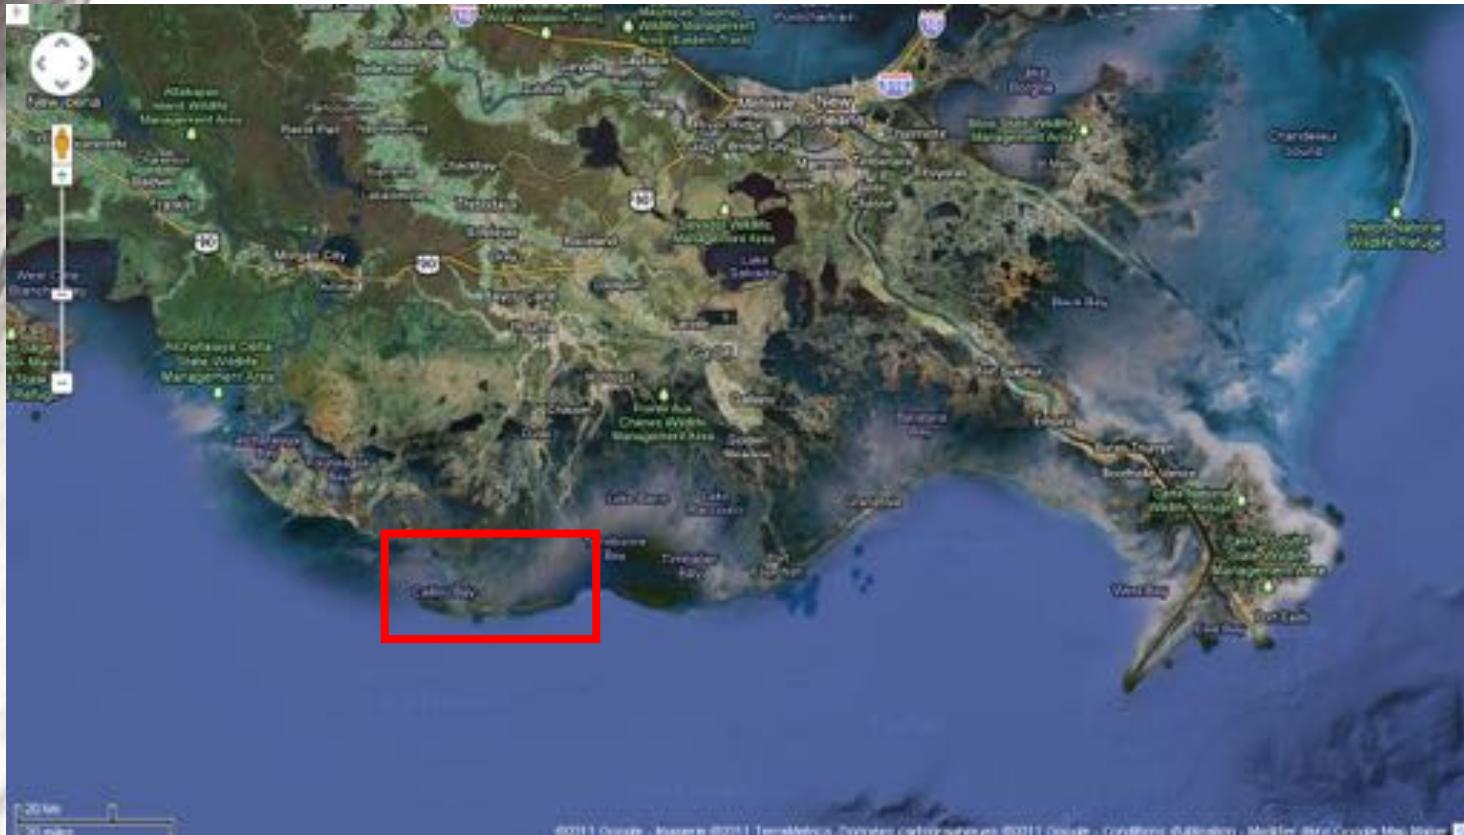

# Subsidence

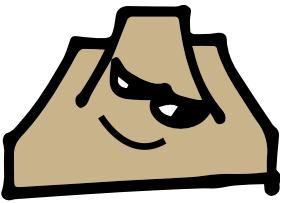

# Subsidence

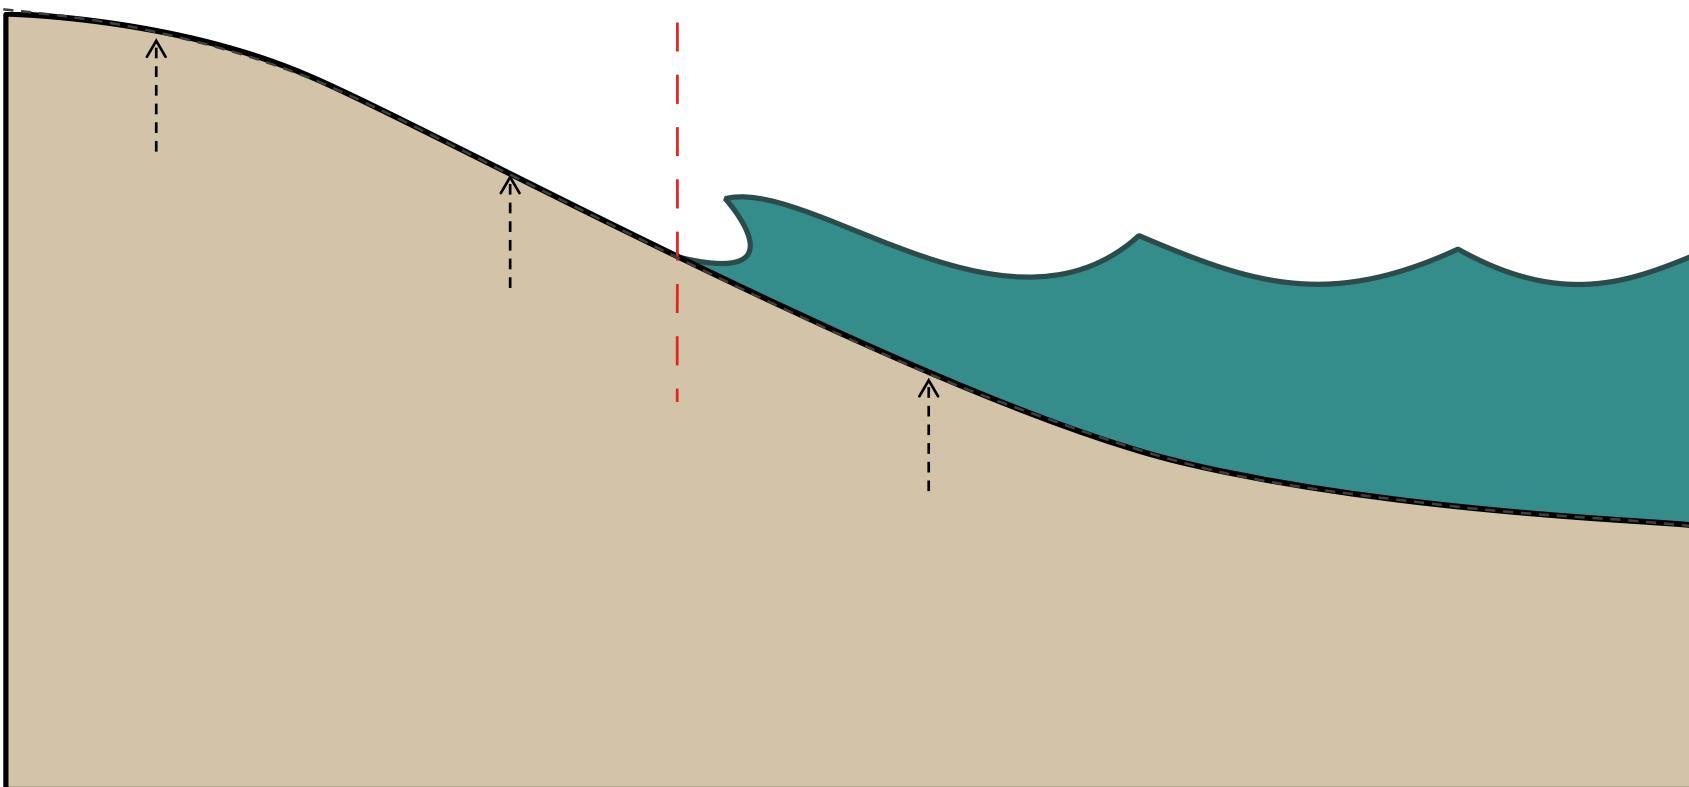

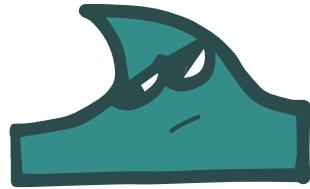

Worst places : Deltas  
SLR + Subsidence + Dams

# Uplift

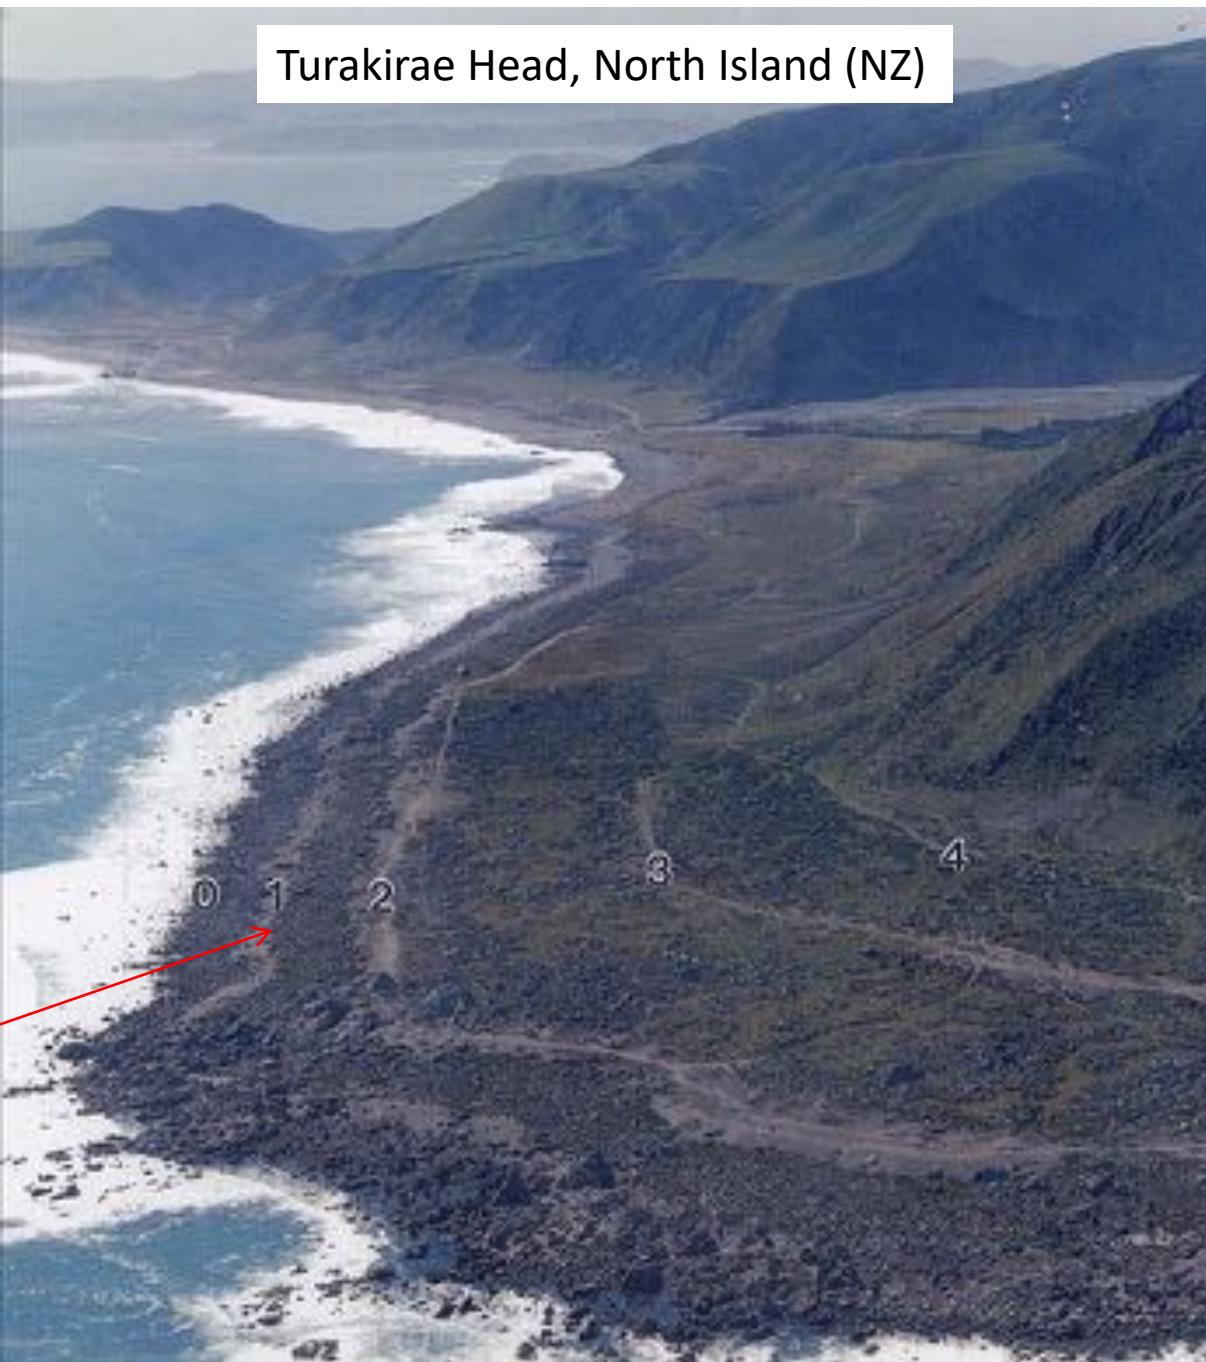

Trait  
de côte

# Uplift

1855  
 $Mw=8.2$   
+6,4 m

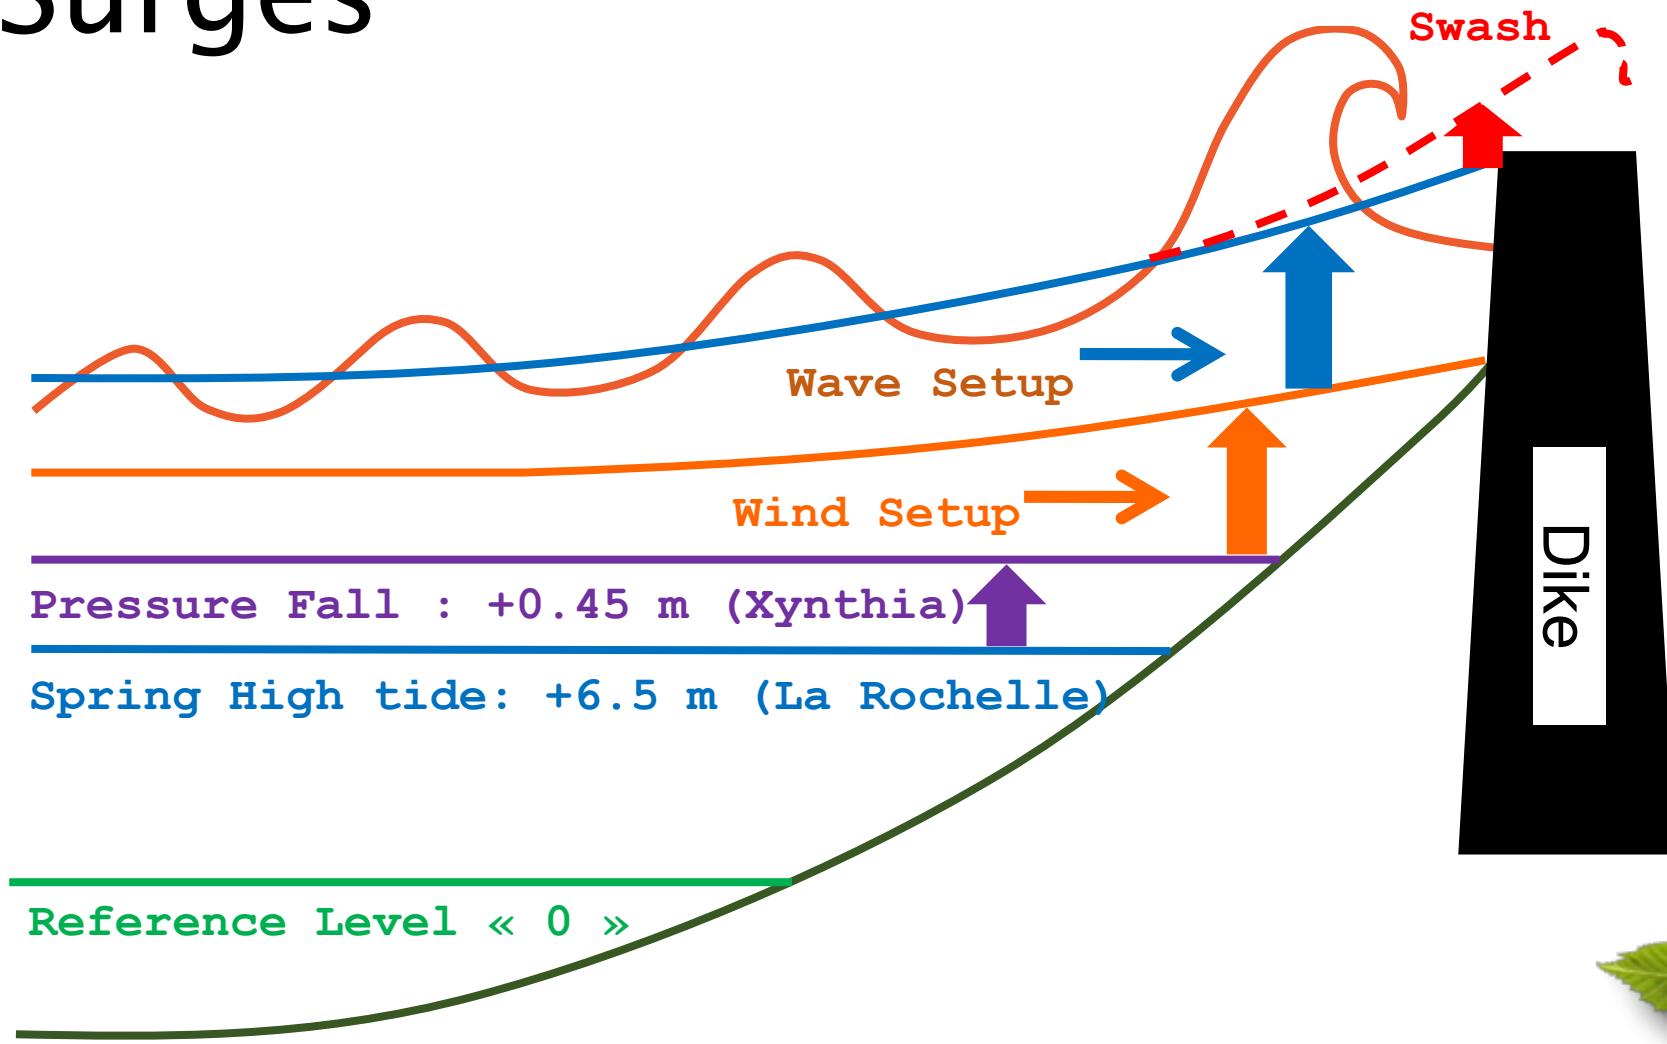

# Local Sea Level Rise Storm Surges

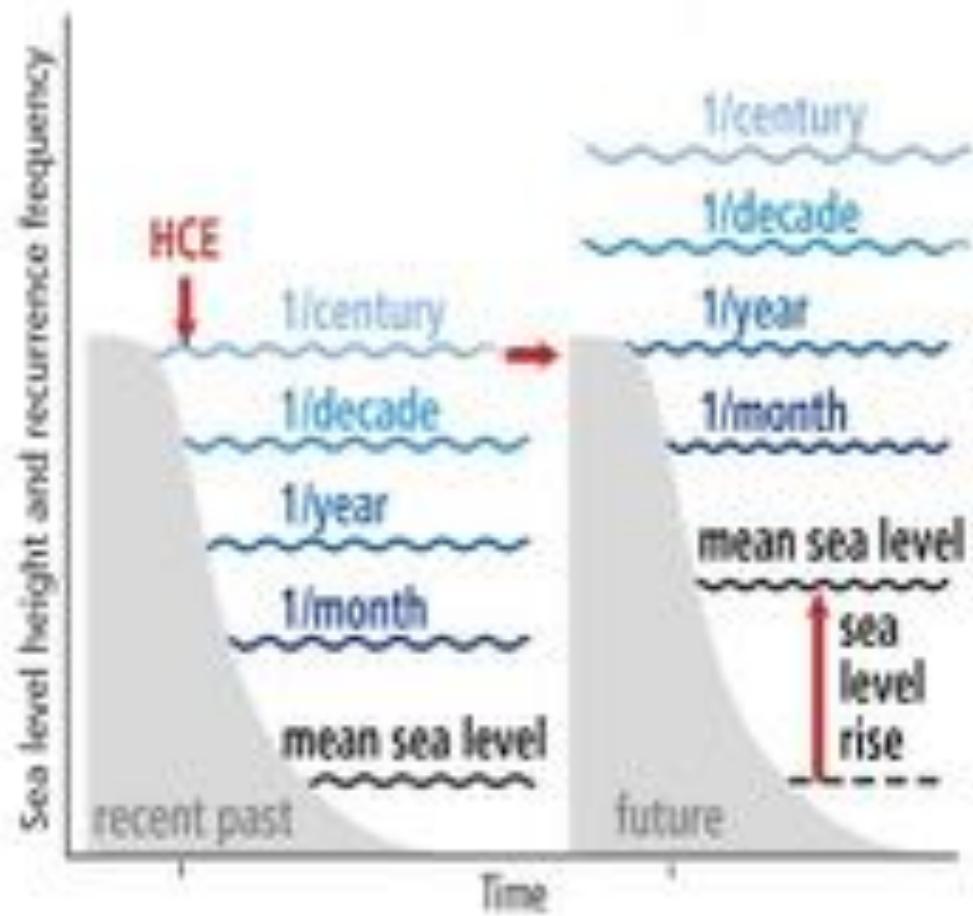

# Storm Surges

Wave setup  
About 10%  
of Wave  
height at the  
breaking  
point

# Global Sea Level Rise = Increase in frequency of extreme sea levels

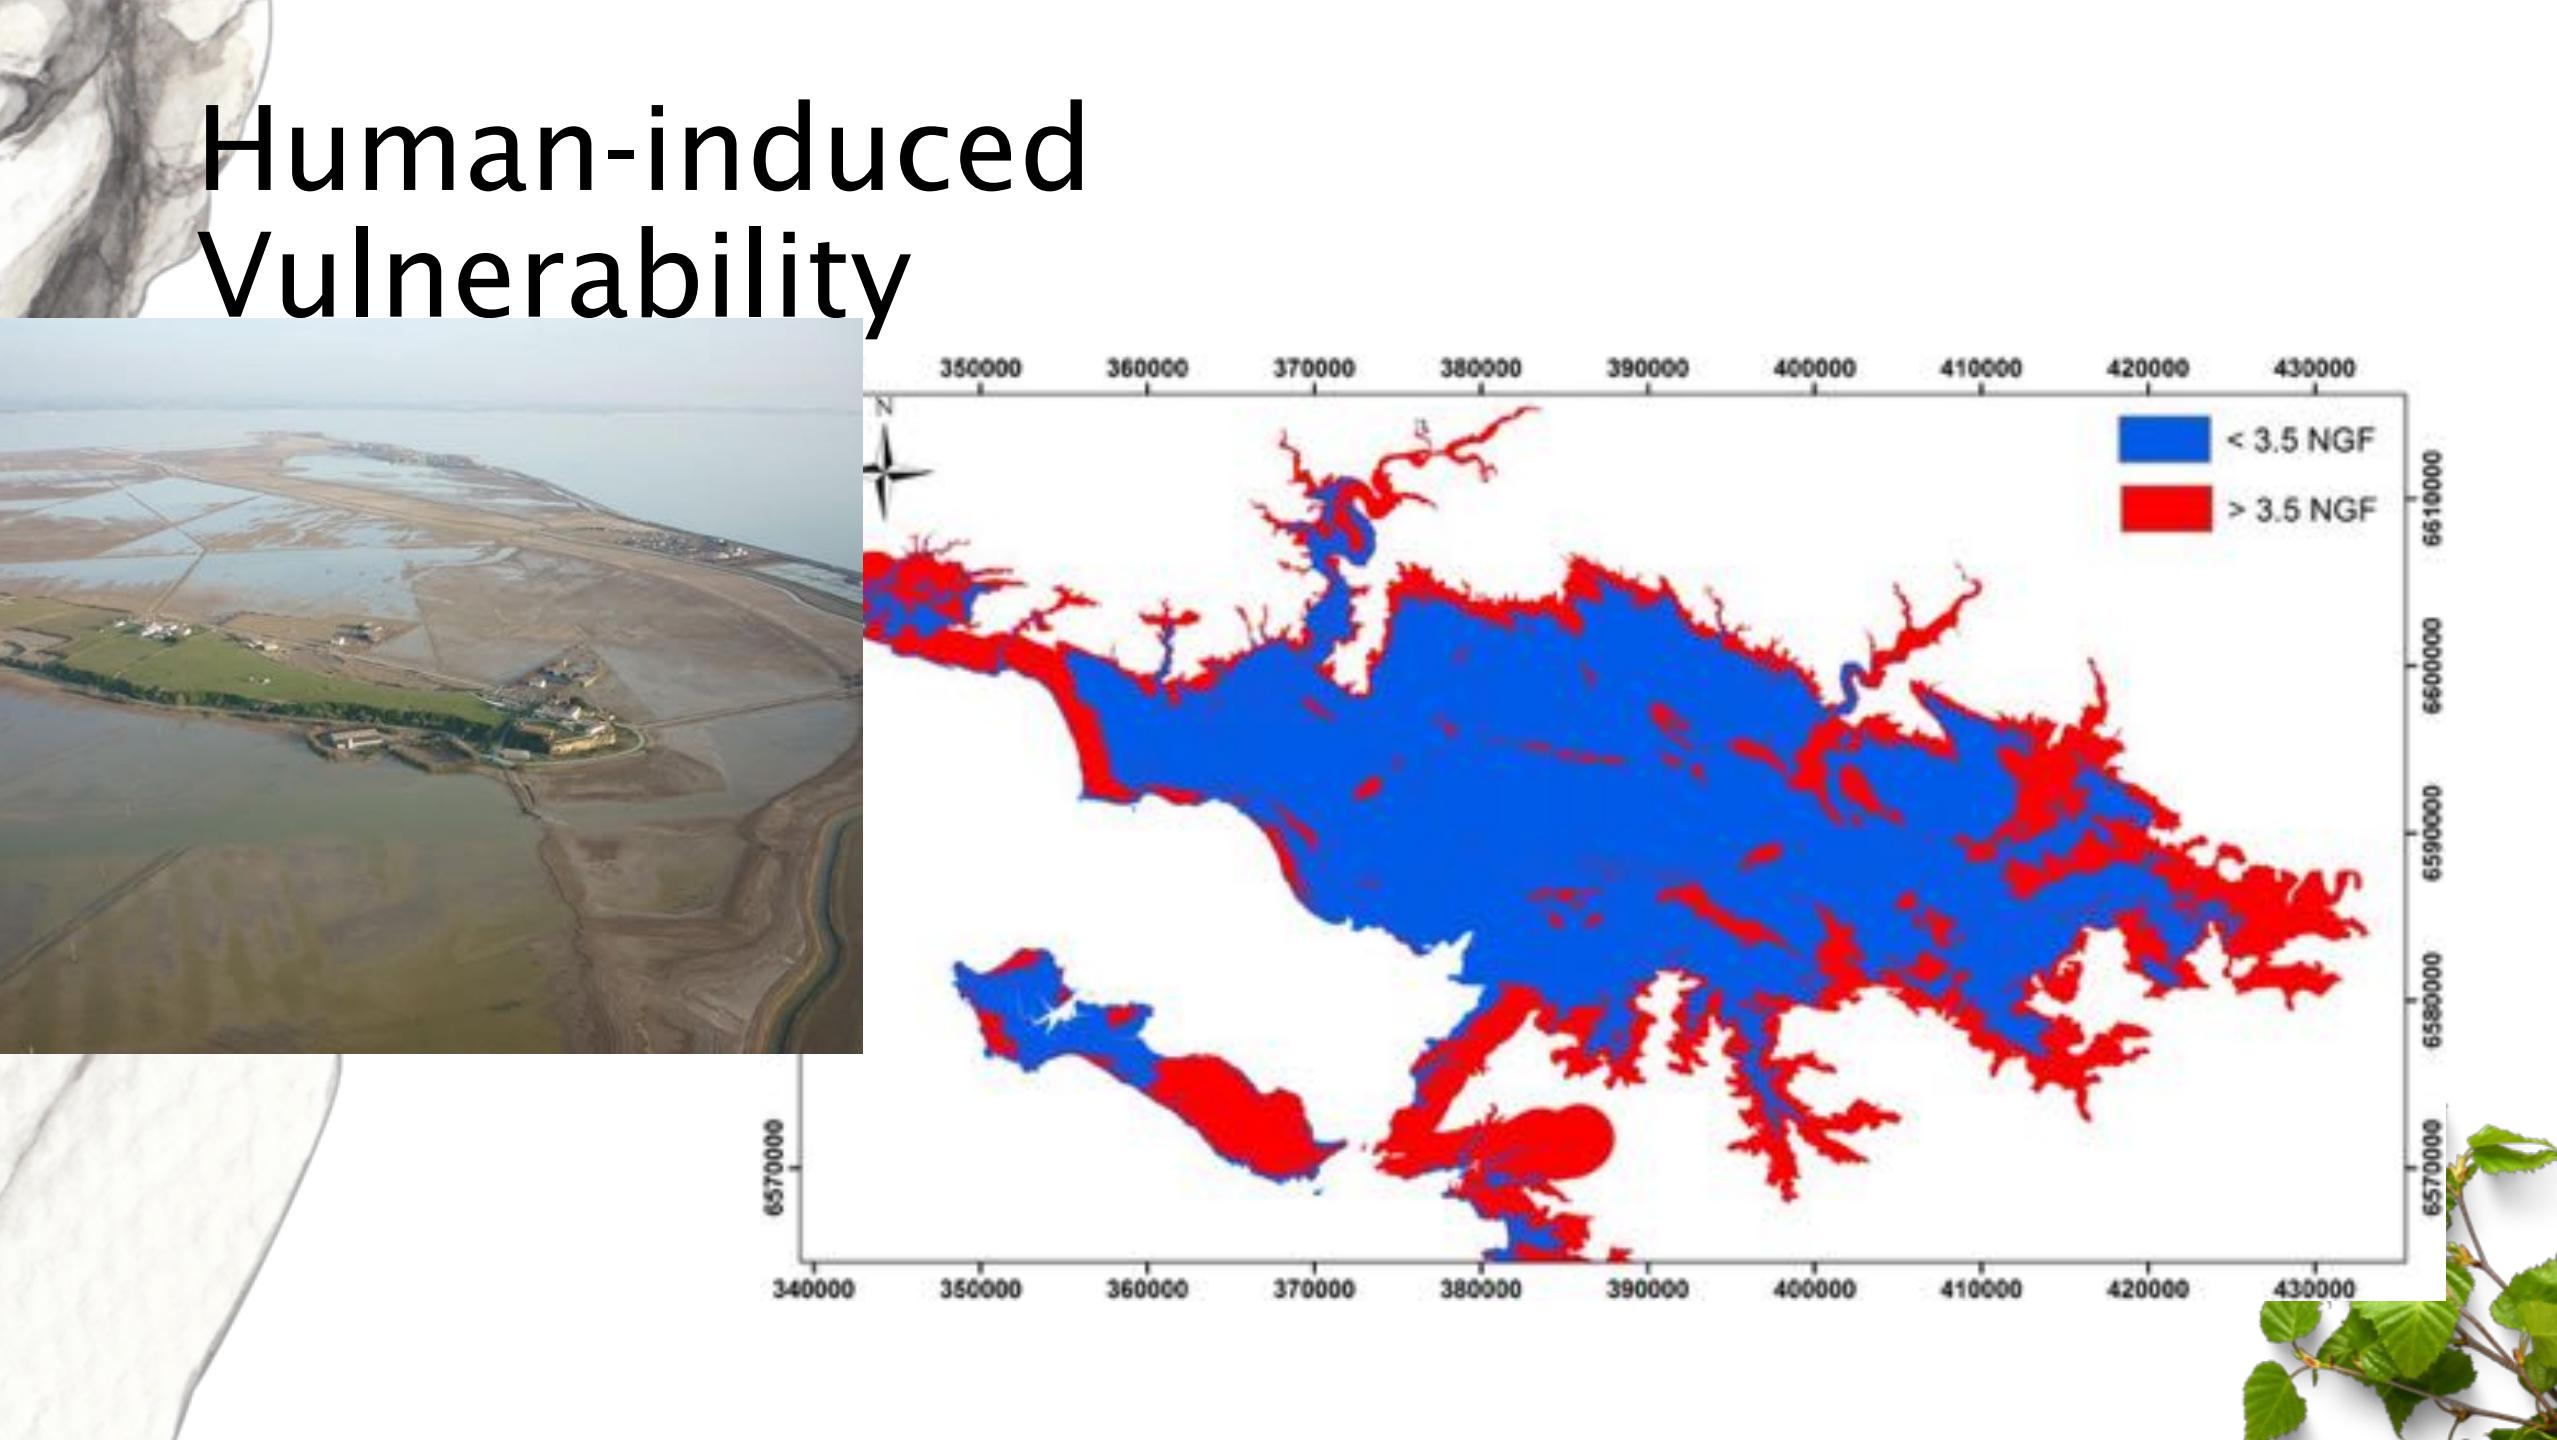

ipcc

Intergovernmental Panel on Climate Change

# Human-induced Vulnerability

# Adaptation

(a) No response

(c) Protection

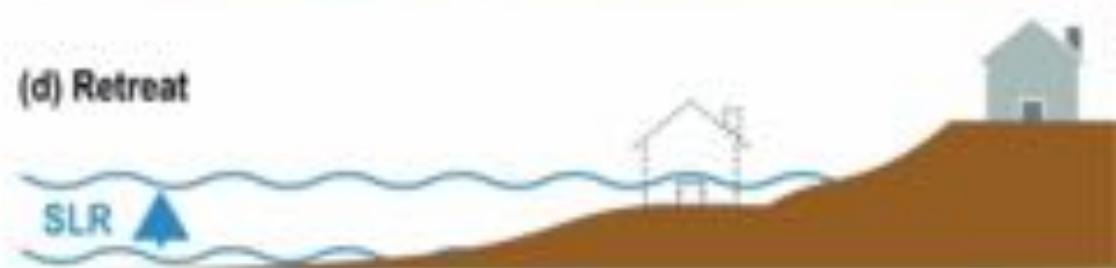

(e) Accommodation

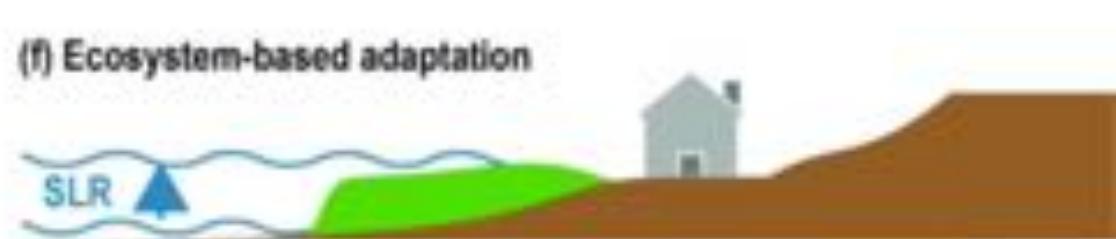

(b) Advance

(d) Retreat

(f) Ecosystem-based adaptation

[https://www.ipcc.ch/site/assets/uploads/sites/3/2019/10/IPCC-SROCC-CH\\_4\\_Box\\_4\\_3\\_figure\\_1-3000x1124.jpg](https://www.ipcc.ch/site/assets/uploads/sites/3/2019/10/IPCC-SROCC-CH_4_Box_4_3_figure_1-3000x1124.jpg)

# Adaptation

## Hard defenses : Biarritz Example (20 millions €)

# Adaptation

Soft Defenses : Sand Motor Example near  
Rotterdam (70 M€)  
(working with Nature)

# Adaptation

## Depolderisation : Mortagne-sur- Gironde example after the Martin Storm

**Before 1999 :**

Farmed Fields -90 cm

Below highest astronomical tide

**1999 : Breach**

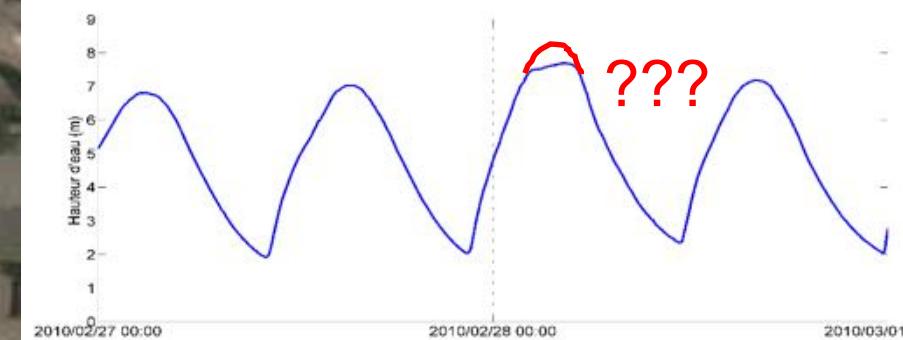

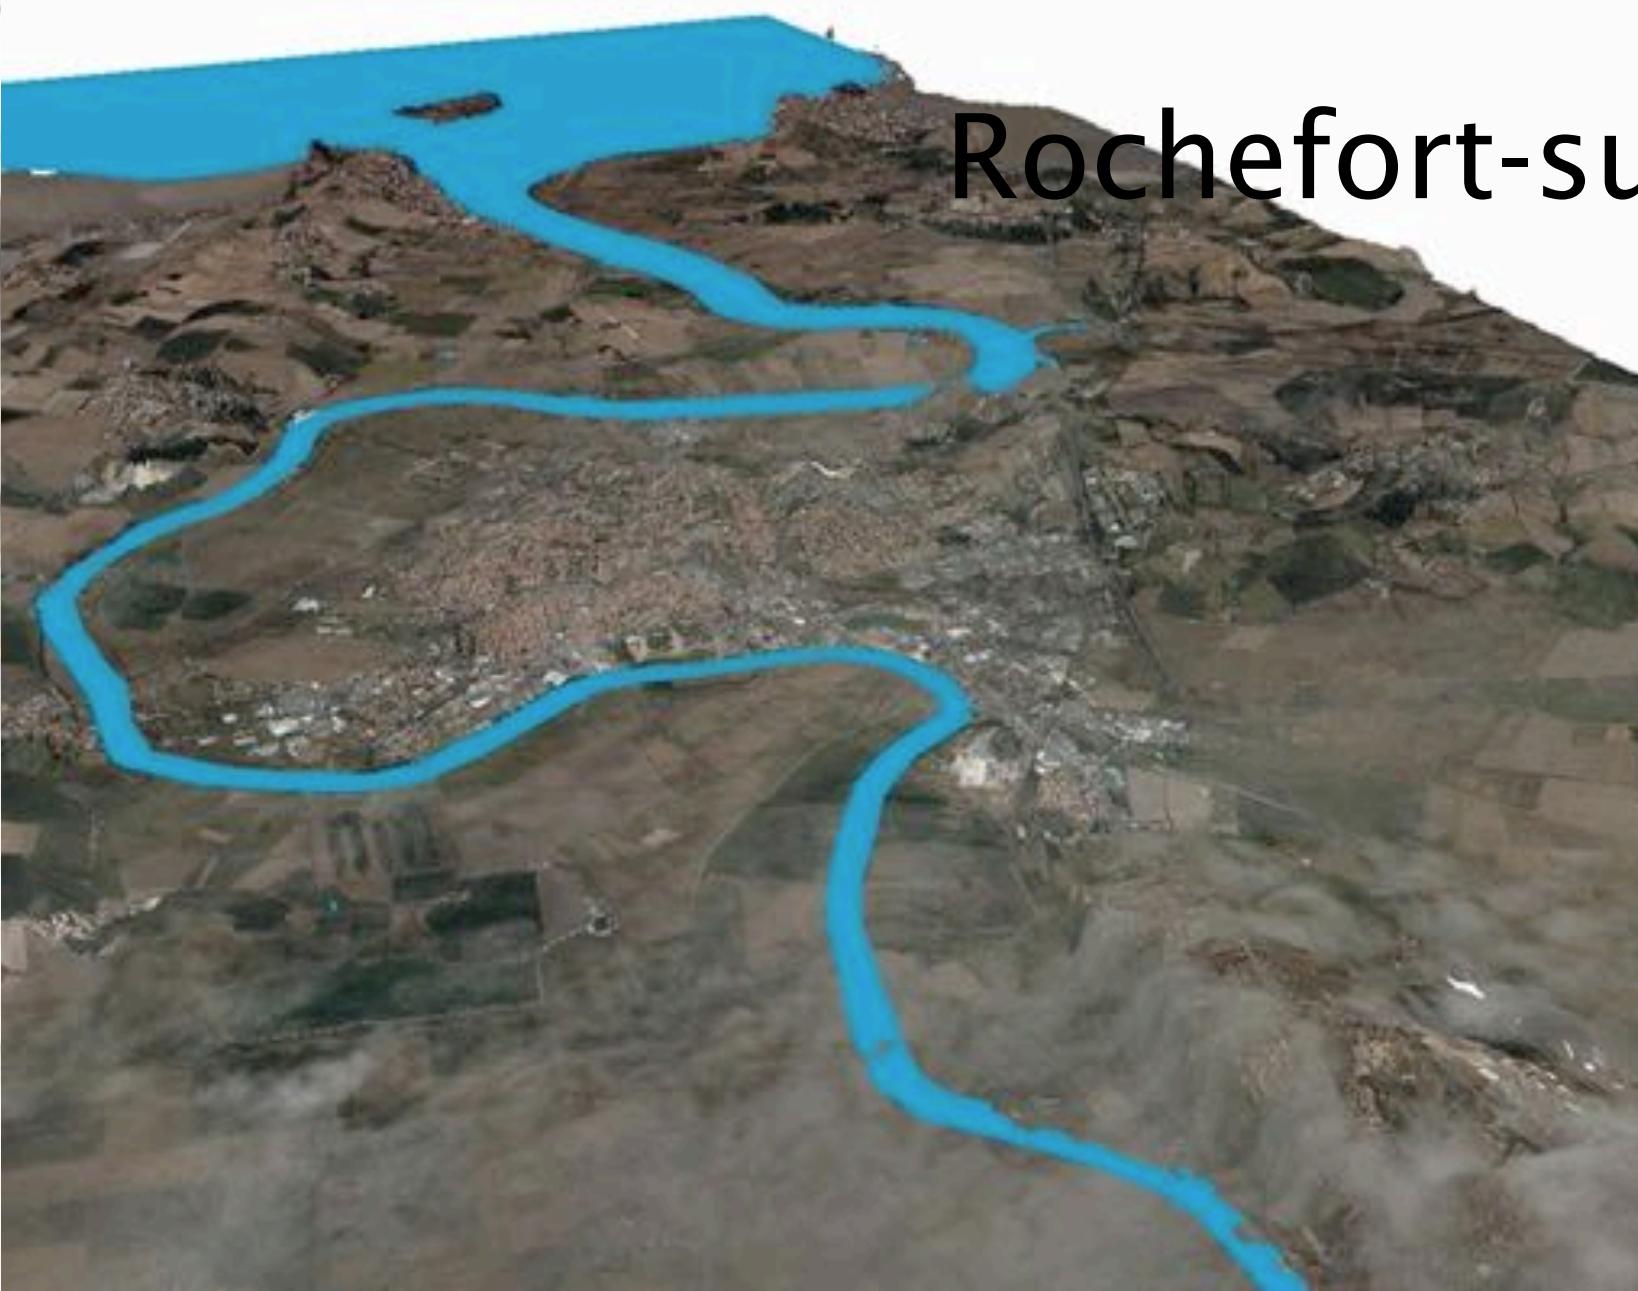

Sedimentartion rate = +9 cm / year

Huge increase in biodiversity

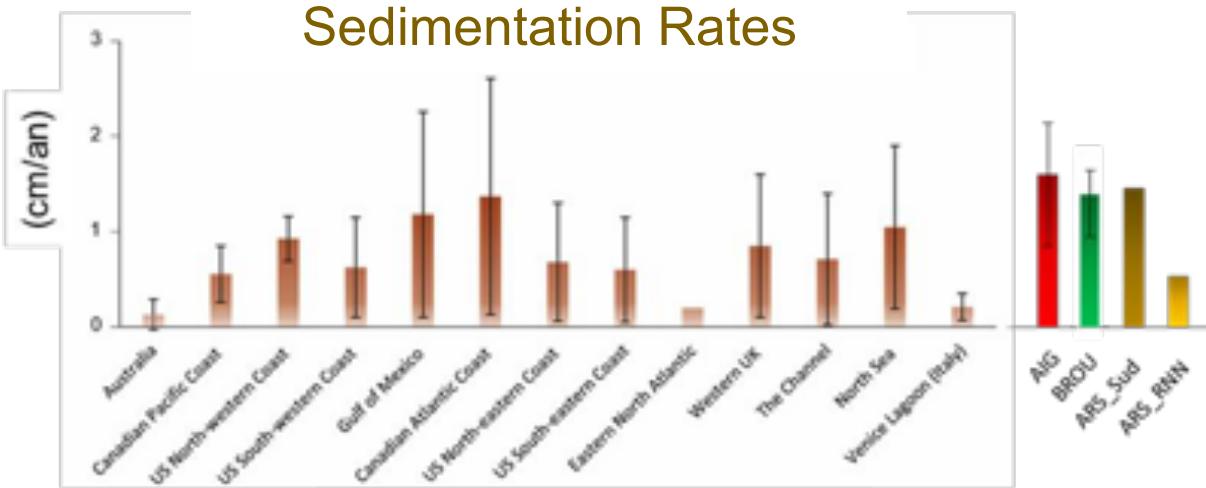

# Extreme Sea Level Limitation

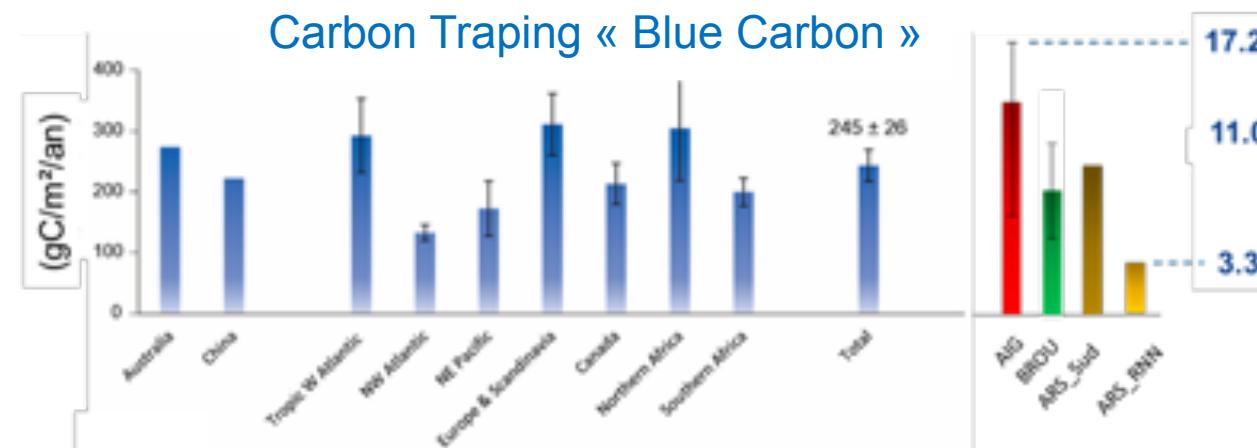

## Rochefort-sur-mer example during Xynthia

# Sedimentation : Barrier effect and Carbon Trapping

Amann et al. *in prep ECSS*

# **ECOSYSTEM-BASED SOLUTIONS**

**Barrier**

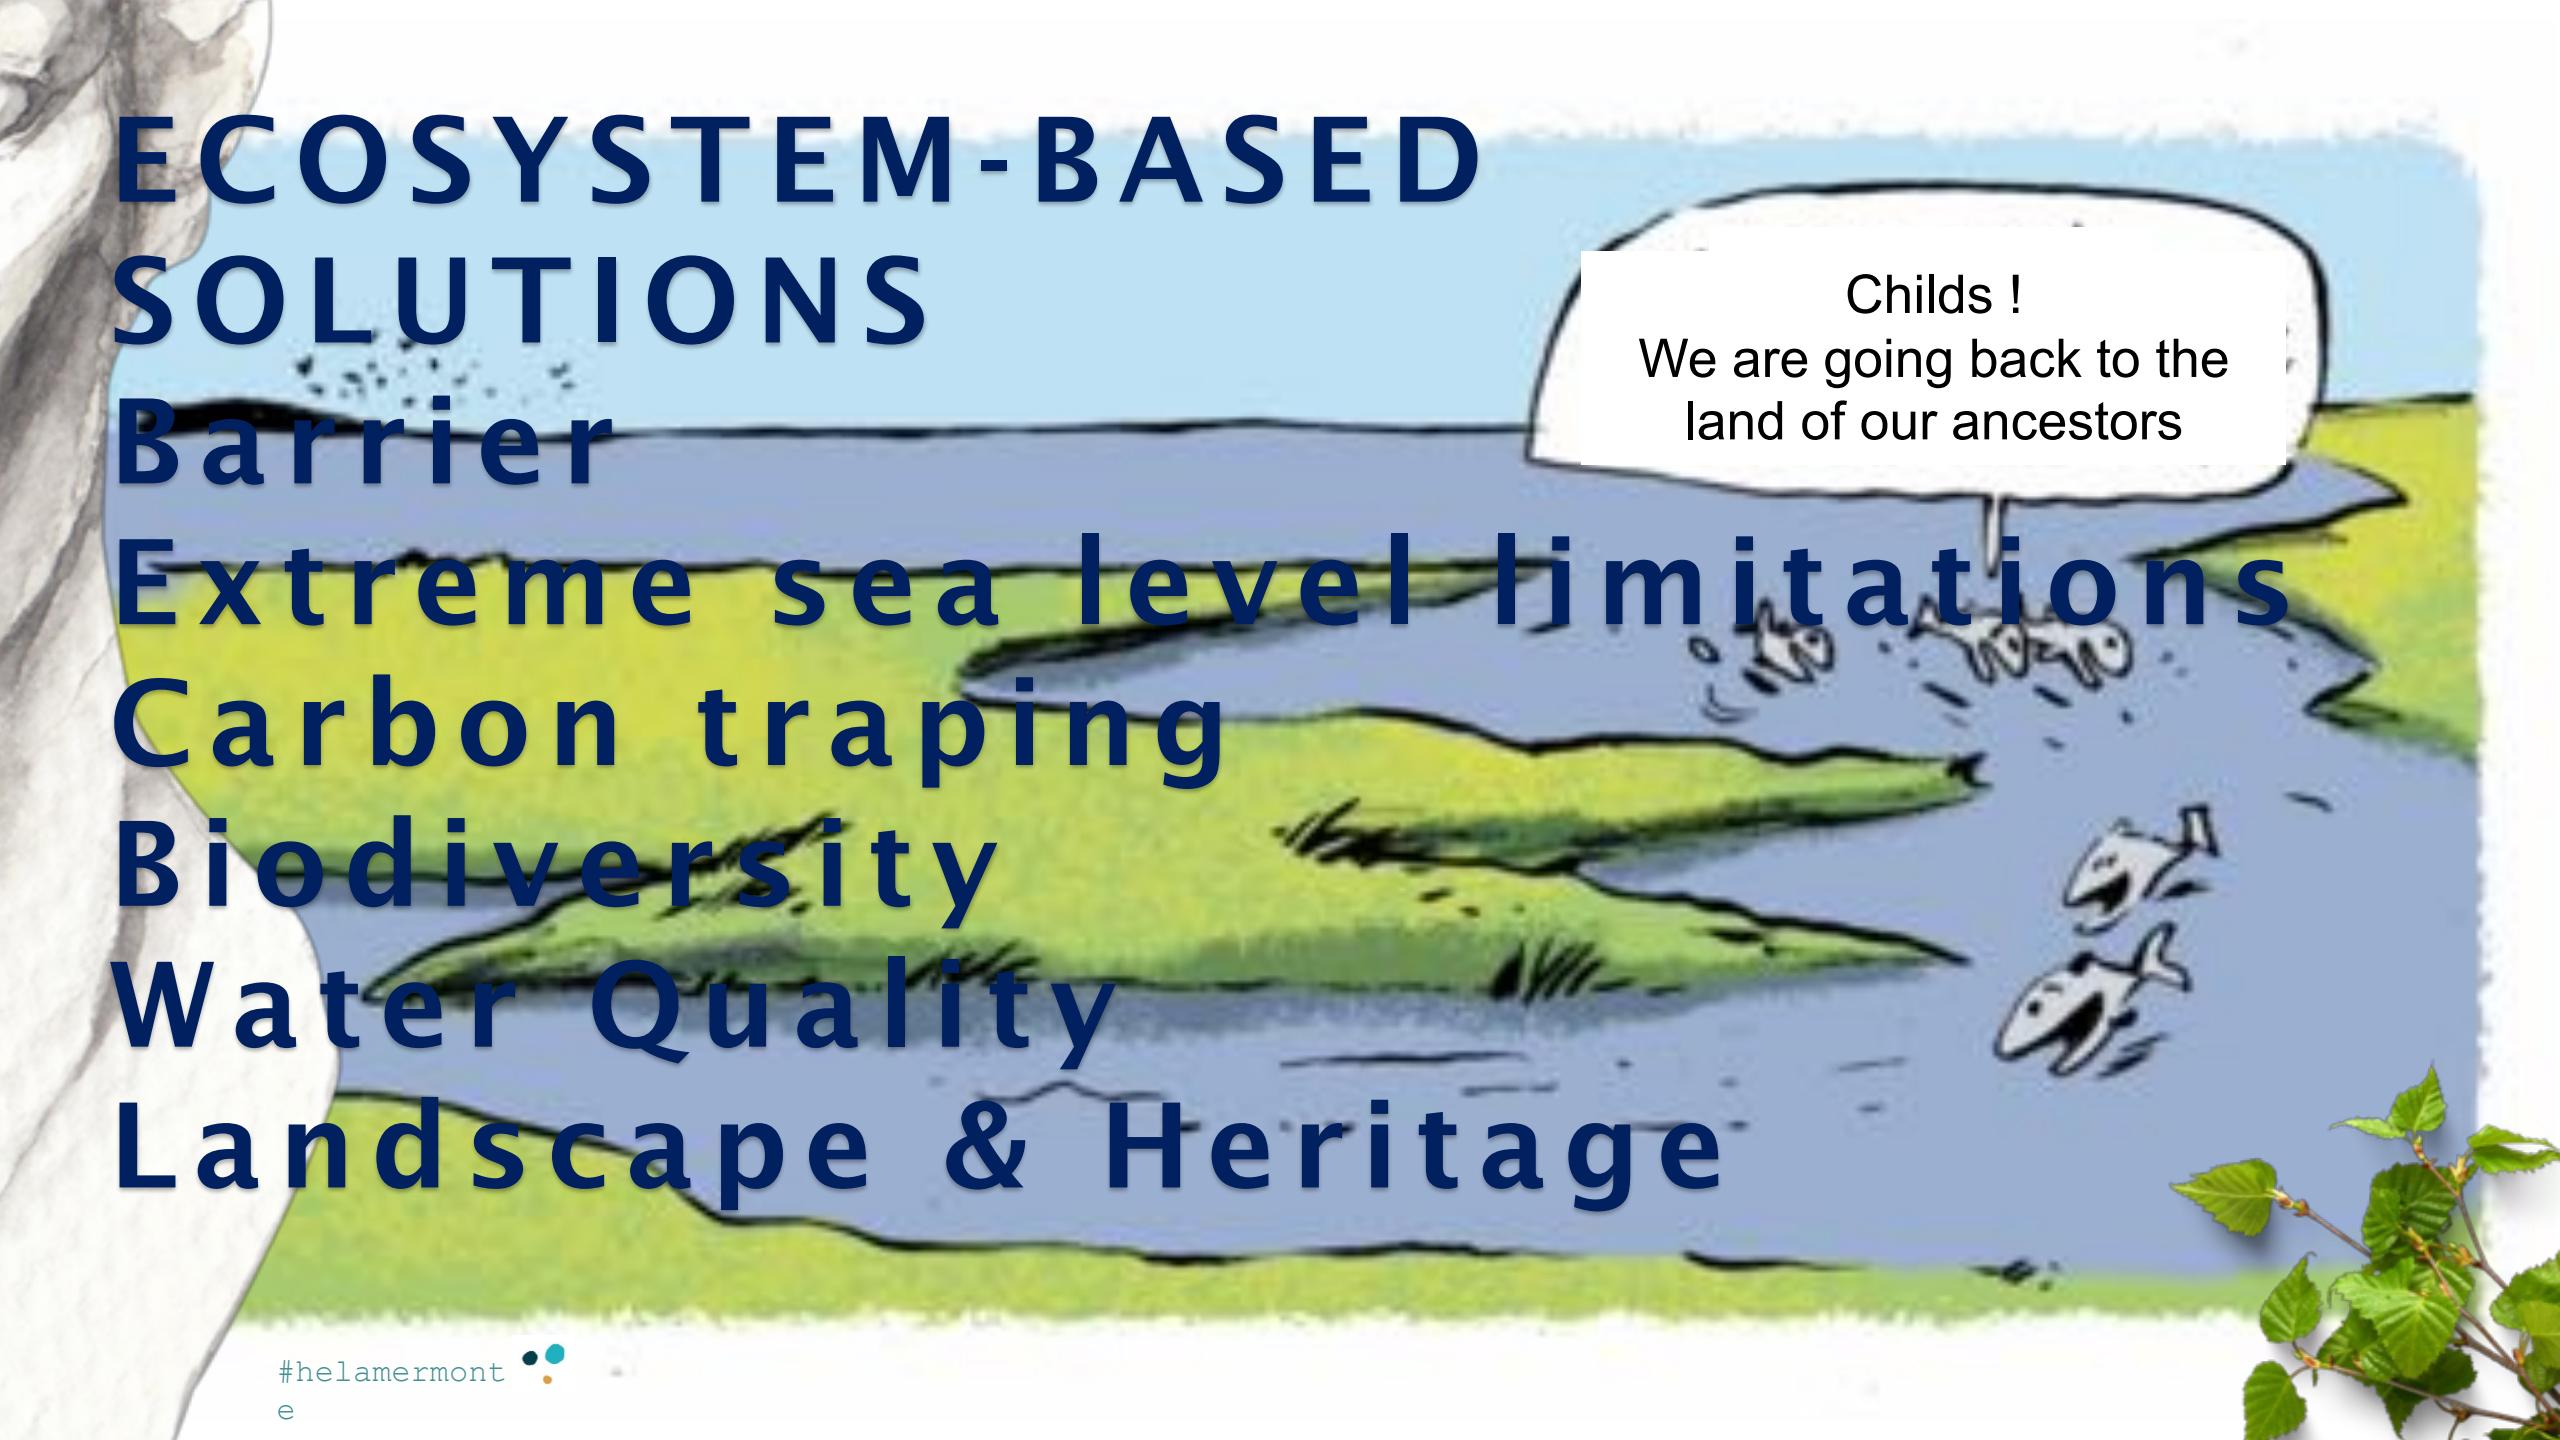

**Extreme sea level limitations**

**Carbon trapping**

**Biodiversity**

**Water Quality**

**Landscape & Heritage**

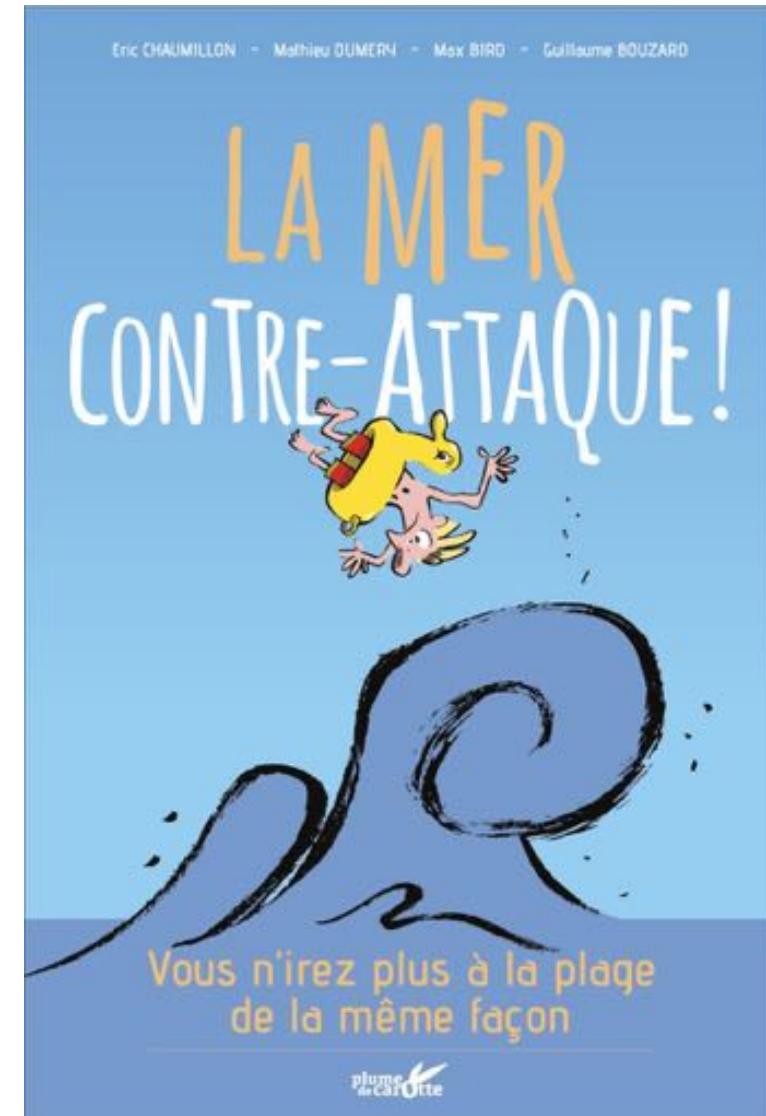

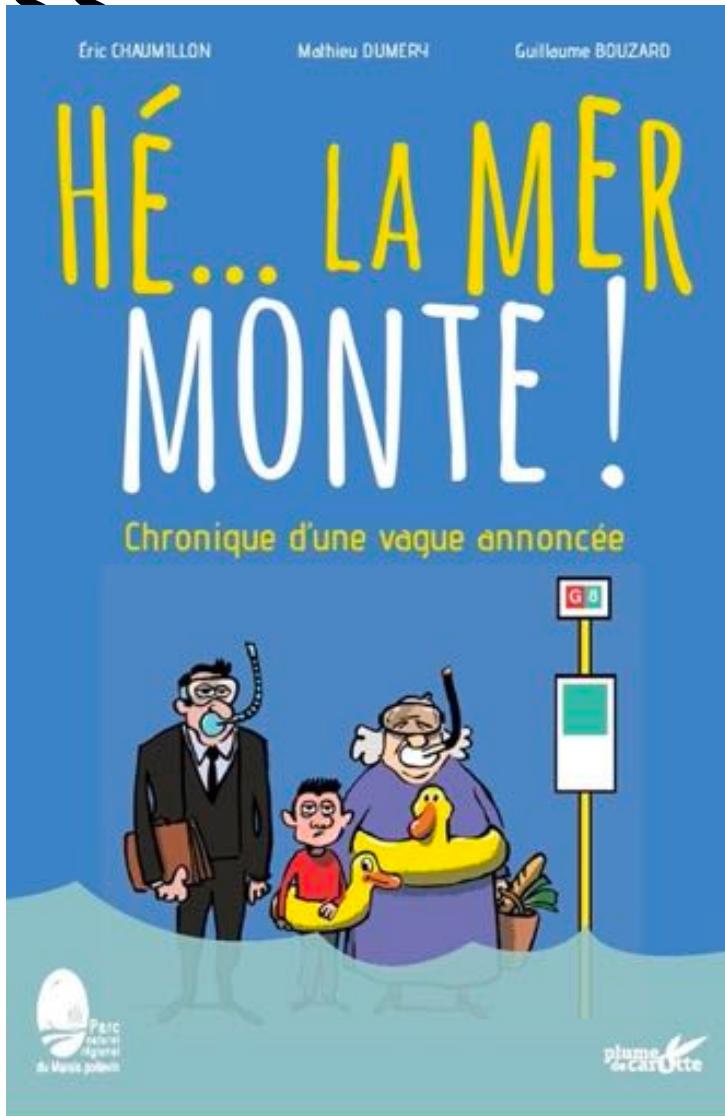

Childs !  
We are going back to the  
land of our ancestors

# A great need for education and awareness

A great need for education and awareness

# Thanks for your attention!
